dissent from their parliamentary parties and demonstrates that preference similarity amongst legislators explains a very substantial proportion of party unity yet cannot explain all of it through a quantitative analysis of the attitudes of legislators to the demands of party unity and what drives these attitudes the book argues that the reason for the difference between observed unity and the levels of unity which can be explained by preference similarity among legislators is the conscious acceptance by mps that the long term benefits of belonging to a united party such as increased influence on legislation lower transaction costs and better chances of gaining office outweigh the short terms benefits of always voting for their ideal policy outcome the volume reinforces this argument through the analysis of both open ended survey questions as well as survey questions on the costs and benefits of belonging to a political party in a legislature a level 1 oxford bookworms library graded reader this version includes an audio book listen to the story as you read written for learners of english by tim vicary england and scotland in the 1500s two famous queens mary the catholic queen of scots and elizabeth i the protestant queen of england it was an exciting and a dangerous time to be alive and to be a queen mary was queen of scotland when she was one week old at sixteen she was also queen of france she was tall and beautiful with red gold hair many men loved her and died for her but she also had many enemies men who said the death of mary is the life of elizabeth a cross national survey of how parliaments adapt to change
