Unmanned 2015-07-28 our most basic relationship with the world is one of technological mediation nowadays our available tools are digital and increasingly what counts in economic social and cultural life is what can be digitally stored distributed replayed augmented and switched yet the digital remains very much materially configured and though it now permeates nearly all human life it has not eclipsed all older technologies this handbook is grounded in an understanding that our technologically mediated condition is a condition of organization it maps and theorizes the largely unchartered territory of media technology and organization studies written by scholars of organization and theorists of media and technology the chapters focus on specific and specifically mediating objects that shape the practices processes and effects of organization it is in this spirit that each chapter focuses on a specific technological object such as the battery clock high heels container or smartphone asking the question how does this object or process organize in staying with the object the chapters remain committed to the everyday empirical world rather than being confined to established disciplinary concerns and theoretical developments as the first sustained and systematic interrogation of the relation between technologies media and organization this handbook consolidates deepens and further develops the empirics and concepts required to make sense of the material forces of organization
