Moana Songbook 2016-12-01 the musicological study of popular music has developed particularly over the past twenty years into an established aspect of the discipline the academic community is now well placed to discuss exactly what is going on in any example of popular music and the theoretical foundation for such analytical work has also been laid although there is as yet no general agreement over all the details of popular music theory however this focus on the what of musical detail has left largely untouched the larger question so what what are the consequences of such theorization and analysis scholars from outside musicology have often argued that too close a focus on musicological detail has left untouched what they consider to be more urgent questions related to reception and meaning scholars from inside musicology have responded by importing into musicological discussion various aspects of cultural theory it is in that tradition that this book lies although its focus is slightly different what is missing from the field at present is a coherent development of the what into the so what of music theory and analysis into questions of interpretation and hermeneutics it is that fundamental gap that this book seeks to fill allan f moore presents a study of recorded popular song from the recordings of the 1920s through to the present day analysis

**Chicago** 2002 a popular history of the art of music by w s mathews the name music contains two ideas both of them important in our modern use of the term the general meaning is that of a pleasing modulation of sounds in this sense the term is used constantly by poets novelists and even in conversation as when we speak of the music of the forest the music of the brook or the music of nature there is also a reminiscence of the etymological derivation of the term as something derived from the muses the fabled retinue of the greek god apollo who presided over all the higher operations of the mind and imagination thus the name music when applied to an art contains a suggestion of an inspiration a something derived from a special inner light or from a higher source outside the composer as all true imagination seems to be to those who exercise it
