more than one billion people still live below the poverty line most of them in south asia and sub saharan africa financial inclusion is a major issue as more than three quarters of the numbers of poor and disadvantaged women and men do not have access to financial products and services such as bank accounts affordable and suitable loans and insurance the key objective of this book is to provide practical case studies of financial inclusion rather than focus on academic debates such as the ideological basis of promoting microfinance using the recently adopted sustainable development goals as an overall framing of the issues it shows how poor and disadvantaged women

and men can be bankable if the right facilitation for maximizing opportunities and addressing constraints are in place case studies confirm that achieving inclusive and sustainable access to financial products and services goes beyond simply enabling poor and disadvantaged women and men to have access to credit or the ability to open a bank account examples from africa asia and latin america demonstrate encouraging progress in making microcredit accessible to millions of poor people the foremost challenge however has been to ensure that they have access to and usage intensity of suitable and affordable financial products and services that meet the needs of their livelihoods as well as risks and mitigation strategies this requires understanding that poor and disadvantaged women and men do not exist in isolation from complex and interdependent functions in the financial system which includes a number of actors diversified services constraints not just symptoms and capacities and incentives overall the book provides a rich source of examples of how building inclusive financial systems can empower the world s poor by increasing income and employment opportunities securing livelihoods and reducing poverty
