## **The Revenue Administration Gap Analysis Program 2017-04-13**

this technical assistance report presents the estimates of tax gaps for general sales tax gst and corporate income tax in costa rica the estimated gst compliance gap in costa rica increased from 29 percent in 2012 to 31 percent in 2016 the compliance gap in 2016 was equivalent to 1.9 percent of gdp the estimated compliance gap is higher than the average value added tax compliance gaps of european countries and latin american countries large gst compliance gaps relative to gdp are observed in manufacturing trade and hotels and restaurants the estimated gst policy gaps were at about 4 percent of gdp from 2012 to 2016 most of the gst policy gap consists of the gst expenditure gap showing the effects of policy choices

## **The Revenue Administration-Gap Analysis Program 2019-01-25**

this report presents estimates of the tax gap for denmark for the period 2008-12 there are two main components to the ra gap methodology for estimating the vat gap 1 estimate the potential vat collections for a given period and 2 determine the accrued vat collections for that period the difference between the two values is the vat gap the methodology employs a top down approach for estimating the potential vat base using statistical data on value added generated in each sector and constructs the accrued vat collections value from tax record data one of the main purposes of this report is to estimate the compliance gap the compliance gap is the difference between the potential vat that could have been collected given the current policy framework and actual accrued vat collections other tax gap measures can be determined using different methods for determining potential vat and these other measures are important in understanding all the factors which are affecting current collections this report will provide estimates for these other gap measures as well and compare and contrast them with the compliance gap

## **Digital Business Analysis 1998**

the covid 19 pandemic triggered renewed interest in the use of different fiscal spending and transfer programmes to address the worsening conditions and deepening inequalities within the labour markets this paper reviews the role of specific fiscal spending and transfer programmes in shaping labour market dynamics by disentangling different macroeconomic and microeconomic mechanisms the paper presents the recent empirical evidence on the topic in an attempt to abstract several empirical regularities and identify research gaps the analysis also highlights gaps in the literature and suggests how future research could fill these gaps

## **Academic and Service Quality in Distance Education 2012**

the department of agriculture fisheries and forestry commissioned the scoping study undertaken by tasmanian quality assured inc this scoping study provides an analysis of existing quality management systems with respect to their ability to address supply chain management of gm and non gm products particularly in relation to segregation and identity preservation to ensure that australia is not disadvantaged in its marketing of agricultural products this report is a generic review of quality management systems and is not focused on any particular system or systems developed for a specific purpose it contains four individual case studies each of which was chosen to provide guidance to users on how different supply chains might operate users can choose the case study that best fits their circumstances then undertake the analysis of each of the steps to see if their supply chain is meeting their requirements

## **Technical Analysis of Gaps 1994**

bioforensics dhs needs to conduct a formal capability gap analysis to better identify and address gaps

## **Biodiversity Gap Analysis 2017**

the imf fiscal affairs department s revenue administration gap analysis program ra gap aims to provide a quantitative analysis of the tax gap between potential revenues and actual collections and this technical note explains the concept of the tax gap for corporate income tax cit and the methodology to estimate cit gaps it includes detailed steps to derive the potential cit base and liability with careful consideration for the theoretical differences between the coverage of statistical macroeconomic data and the actual tax base of cit and then compare the estimated results with actual declarations and revenues although the estimated gaps following the approach will have margins of errors it has the advantage of using available data without additional costs of collection and suits initial evaluations of overall cit noncompliance in a country

## **Using Yield Gap Analysis to Give Sustainable Intensification Local Meaning 1984**

the u s geological survey usgs conducted a gap analysis to evaluate how well the usgs streamgauge network meets a variety of needs focusing on the ability to calculate various statistics at locations that have streamgages gaged and that do not have streamgages ungaged this report presents the results of analysis to determine where there are gaps in the network of gaged locations how accurately desired statistics can be calculated with a given length of record and whether the current network allows for estimation of these statistics at ungaged locations the analysis indicated that there is variability across the nation s streamflow data collection network in terms of the spatial and temporal coverage of streamgages in general the eastern united states has better coverage than the western united states the arid southwestern united states alaska and hawaii were observed to have the poorest spatial coverage using the dataset assembled for this study except in hawaii these areas also tended to have short streamflow

records differences in hydrology lead to differences in the uncertainty of statistics calculated in different regions of the country arid and semiarid areas of the central and southwestern united states generally exhibited the highest levels of interannual variability in flow leading to larger uncertainty in flow statistics
