A complete treatise on practical land-surveying ... The eighth edition, greatly enlarged by numerous additions and improvements, etc 1843 a highly ambitious and provocative survey of the cultural history of science and industry from the seventeenth to the nineteenth centuries journal of modern history in 1687 the publication of isaac newton's *Principia Mathematica* sparked a profound transformation in the world from that event in the late seventeenth century to the crystal palace exhibition of 1851 science gradually moved to the center western thought and economic development in practical matter margaret jacob and larry stewart chronicle this dramatic epochal shift despite powerful opposition on the continent a newtonian understanding gained broad based acceptance and practical application by the mid eighteenth century the race was on to apply newtonian mechanics to industry and manufacturing the ascendancy of the new science culminated in the creating of the crystal palace exhibition london's temple to scientific and technological progress with fascinating insight into the changing culture of industry and higher learning jacob and stewart show that there was nothing inevitable about the scientific revolution it is easy to forget that science might have been stillborn or remained the

esoteric knowledge of court elites instead for better and for worse science became a centerpiece of western culture
