Report of Visit to University of Jordan 1986 publisher description

A History of Jordan 2004-02-09 this book gives a detailed account of the scarce water resources of Jordan with a focus on their quantities, quality and use for different sectors. It details the political, social and economic dimensions of the scarce water resources along with their implications on Jordan's cooperation with its neighbors. The book includes implemented projects of dams, canals, water supply networks, waste water treatment and more. It gives an overview of which projects have been successful and which have failed to achieve their purposes and why. Shared water with other countries and their developmental implications to the water sector are discussed and future water supply projects such as the Red Sea Dead Sea Conduit project are elaborated on. The book also touches upon the waves of refugees and their impact on the water sector and water strategies in Jordan.

Water Resources of Jordan 2018-05-18 King Abdullah played an active role in the partition of Palestine and as a result has always been viewed as one of the most controversial figures in modern Middle East history. This book is the first in-depth study of the historical and personal circumstances that made him so. Born in Mecca in 1882 of a family that traced its lineage to the prophet Muhammad, Abdullah belonged to the Ottoman ruling elite. He grew up in Istanbul and returned to Mecca when his father was appointed Sharif in 1908. During the First World War, he earned nationalist credentials as a leader of the Arab revolt against the Ottoman Empire. Owing to his alliance with Britain in the revolt, he emerged afterwards as a contender for power in a Middle East now dominated by Britain. Despite grandiose ambitions, Abdullah ended up as Britain's client in the mandated territory of Transjordan. His dependence on Britain was exacerbated by his situation in Transjordan, an artificial creation with no significant cities, no natural resources and little meaning beyond its importance to British strategy. Within the constraints of British interests, it was left to Abdullah to make something of his position and he spent the remainder of his life looking beyond Transjordan's borders for a role, a clientele or a stable balance of interests which would allow him a future independent of British fortunes. He found all three after 1948 when, in conjunction with the creation of Israel, he came to rule the portion of Palestine known as the West Bank.

King Abdullah, Britain and the Making of Jordan 1987 this book introduces the second part of a collection of exquisite coloured photographs which illustrate diverse wild medicinal and aromatic plant species in Jordan. It discusses 279 species from 60 families recorded from 400m below sea level in the Dead Sea and the Jordan Valley to 2000m above sea level in the north and from the deserts of Al Azraq and Wadi Rum in the east and the south to the lush black soils in the north and along the Jordan River and water channels in the west. Information on species taxonomy and botanical affiliation, chemical constituents, plant parts used in medication, medicinal and pharmacological importance, healing properties and uses in folk medicine is also presented. As such, the book is a valuable resource on diverse wild plant species of different growth habits and habitats used for culinary health and other purposes.

The Coloured Atlas of Medicinal and Aromatic Plants of Jordan and Their Uses (Volume Three) 2020-04-15 Jordan is one of the most important countries of the Fertile Crescent although it is not richly endowed with material resources. Its political significance in the region gives it considerable authority. This book focuses on the economic development of Jordan over the last decade. It analyses the structural changes the economy has undergone and examines the experience of the key sectors. It also looks at the contribution of foreign aid and emigrant workers' remittances to the economy. The book concludes that there is a significant potential for the Jordanian economy but the current political and economic problems facing it are daunting. First published in 1987.

The Economic Development of Jordan (RLE Economy of Middle East) 2014-10-30 In the first book to address the dilemma faced by Jordanian women in the workforce, Amira El Azhary-Sonbol delineates the constraints that exist in a number of legal practices, namely penal codes that permit violence against Muslim women and personal status laws that require a husband's permission for a woman to work, leniency in honor crimes and early marriage and motherhood for girls. Other factors that extend the patriarchal power throughout a woman's life and ultimately deny her full legal competency significantly, Sonbol notes that society's accepting as Islamic the legal constraints that control women's work constitutes a major barrier to any effort to change them. Even though historically the Islamic Sharia actually encourages women's work and despite the fact that Muslim women have contributed materially to their society's economy, the author covers new ground as she effectively illustrates how Jordanian laws governing gender, family and work combine with laws and legal philosophies derived from tribal, traditional Islamic and modern laws to form a strict patriarchal structure.

Women of Jordan 2022-04-12 This handbook presents a broad yet nuanced portrait of the Hashemite Kingdom of Jordan. Its socio-political rifts, economic challenges, foreign policy priorities and historical complexities. The Hashemite Kingdom of Jordan has traditionally been an oasis of peace and stability in the ever-turbulent Middle East. The political ambitions of regional powers, often expressed in the form of territorial aggrandisement, have followed the Hashemites like an inseparable shadow. The scarcity of natural resources, especially water, has been compounded by the periodic influx of refugees from its neighbours. As a result, many Arab and non-Arab alike have questioned the longevity and survival of Jordan. These uncertainties were compounded when the founding ruler, King Abdullah I, became involved in the nascent Palestinian problem at the end of World War II. The annexation of the eastern part of Mandate Palestine or the West Bank in the wake of the 1948 war transformed the Jordanian demography and sowed the seeds of an uneasy relationship with the Palestinian component of its population: citizens, residents and refugees. Though better natural resources and stronger leaders have not ensured political stability in many Arab and non-Arab countries, Jordan has been an exception. Indeed, since its formation as an emirate by the British in 1921, the kingdom has seen only four rulers, a testimony to the sagacity and political foresight of the Hashemites. The Hashemites have managed to sustain the semi-rentier model primarily through international aid and assistance, which in turn inhibits Jordan from pursuing rapid political and economic reforms. Though a liberal, multi-religious and multicultural society, Jordan has been hampered by social cleavages, especially between the tribal

population and the forces of modernization

Kingdom of Jordan 2015-12-08 the goal of the second international food legume research conference held in cairo egypt was to build on the success of the first conference held nearly 6 years earlier at spokane washington usa it was at that first conference where the decision was made to hold the second conference in egypt and so near the ancestral home of these food legume crops it has been a long held view that the cool season food legumes had their origin in the mediterranean basin and the near east arc and there is little doubt that food legumes were a staple food of the ancient egyptian civilization the cool season food legumes have the reputation for producing at least some yield under adverse conditions of poor fertility and limited moisture i e in circumstances where other crops are likely to fail completely yields of cool season food legumes are particularly poor in those regions where they are most important to local populations the influx of more profitable crops such as wheat maize and soybeans have gradually relegated the food legumes to marginal areas with poor fertility and limited water which exposes them to even greater degrees of stress in the past two decades production of food legumes has declined in most of the developing countries while at the same time it has expanded greatly in canada australia and most notably in turkey
