globalization and technological advances have had a dramatic impact on the relationship between media and politics how can we understand the connection between the two in the present day alexa robertson argues that we cannot understand the power of the one without taking the other into account this exciting and accessible book provides fresh insight into our contemporary media landscape adopting a truly comparative global approach in media and politics in a globalizing world robertson encourages the reader to explore the relationship from different perspectives those of the politician the journalist the activist and the ordinary citizen and how the relationship between media and politics varies across cultures illustrated with contemporary examples throughout the book weighs up arguments for seeing new developments in terms of change or continuity as empowering or debilitating and as promoting or undermining democracy suitable for undergraduates and postgraduates studying politics media and sociology it also will be of interest to the general reader wishing to understand the complex role of the media in political life the world over for additional support and information visit this book s companion website at mediapolitics.net

The British National Bibliography 2020-05-05

a field manual to the technologies that are transforming our lives everywhere we turn a startling new device promises to transfigure our lives but at what cost in this urgent and revelatory excavation of our information age leading technology thinker adam greenfield forces us to reconsider our relationship with the networked objects services and spaces that define us it is time to re evaluate

the silicon valley consensus determining the future we already depend on the smartphone to navigate every aspect of our existence we re told that innovations from augmented reality interfaces and virtual assistants to autonomous delivery drones and self driving cars will make life easier more convenient and more productive 3d printing promises unprecedented control over the form and distribution of matter while the blockchain stands to revolutionize everything from the recording and exchange of value to the way we organize the mundane realities of the day to day and all the while fiendishly complex algorithms are operating quietly in the background reshaping the economy transforming the fundamental terms of our politics and even redefining what it means to be human having successfully colonized everyday life these radical technologies are now conditioning the choices available to us in the years to come how do they work what challenges do they present to us as individuals and societies who benefits from their adoption in answering these questions greenfield s timely guide clarifies the scale and nature of the crisis we now confront and offers ways to reclaim our stake in the future

Bibliography of Australian Medicine and Health Services to 1950: Name 2016-04-15

in making value timothy d taylor examines how people s conceptions of value inform and shape their production and consumption of music drawing on anthropological value theory taylor theorizes music s economic and noneconomic forms of value both ethnographically and historically he covers the creation and exchange of value in a wide range of contexts indie rock scenes an irish traditional music session the work of music managers how supply chains function to create various forms of value how trendspotters seek out and create value and how musical performances act as media of value taylor shows that to focus on value is to attend to what is meaningful to people as they move

through their worlds ultimately taylor demonstrates that theorizing value aids us in moving beyond the music itself toward understanding how musicians workers in the music business and audiences struggle to make and maintain what they value

Protracted Displacement in Asia 1981

the autobiography of thirty one year old ontario prisoner shane silky thomas who was born in jamaica but moved to canada with his mother when he was ten for the past thirteen years he has only lived outside a prison for about three months after being beaten by his mother as a child his life has been filled with assaultive behavior now he is changing his life by taking medicine for schizophrenia and other mental problems and also by attending church

Current Catalog 2002

silicon valley wants us to believe that technology will revolutionize our cities and the ways we move around autonomous vehicles will make us safer greener and more efficient on demand services like uber and lyft will eliminate car ownership micromobility devices like electric scooters will be at every corner and drones will deliver goods and services meanwhile visionaries like elon musk promise to eliminate congestion with tunnels and uber help with flying cars the future of transport is frictionless

sustainable and according to paris marx a threat to our ideas of what a society should be road to nowhere exposes the problems with tech s visions of the future and argues that we cannot allow ourselves to be continually distracted by technological fantasies that delay the collective solutions we already know are effective technological solutions to social problems and the people who propose them must be challenged if we are to build cities and transportation systems which serve the public good in response paris marx offers a vision for a more collective way of organizing transportation systems which considers the needs of poor marginalized and vulnerable peoples the book also argues that rethinking mobility can be the first step in a broader reimagining of how we organize our social economic and political systems to serve the many not the few

it s not capitalism it s not neoliberalism what if it s something worse in this radical and visionary new book mckenzie wark argues that information has empowered a new kind of ruling class through the ownership and control of information this emergent class dominates not only labour but capital as traditionally understood as well and it s not just tech companies like amazon and google even

walmart and nike can now dominate the entire production chain through the ownership of not much more than brands patents copyrights and logistical systems while techno utopian apologists still celebrate these innovations as an improvement on capitalism for workers and the planet it s worse the new ruling class uses the powers of information to route around any obstacle labor and social movements put up so how do we find a way out capital is dead offers not only the theoretical tools to analyze this new world but ways to change it drawing on the writings of a surprising range of classic and contemporary theorists wark offers an illuminating overview of the contemporary condition and the emerging class forces that control and contest it

films and television dramas about the second world war have always been popular written by acknowledged experts in the field this collection offers challenging sometimes controversial insights into how the popular memory of the second world war has been re pictured since 1989 which marked the sixtieth anniversary of the start of the war

Unstoppable 2023-02-14

while much attention has focused on society culture and the military during the algerian war of independence law order and empire addresses a vital component of the empire that has been overlooked policing samuel kalman examines a critical component of the construction and maintenance of a racial state by settlers in algeria from 1870 onward in which arabs and berbers were subjected to an ongoing campaign of symbolic structural and physical violence the french administration encouraged this construct by expropriating resources and territory exploiting cheap

labor and monopolizing government all through the use of force kalman provides a comprehensive overview of policing and crime in french algeria including the organizational challenges encountered by officers unlike the metropolitan variant imperial policing was never a simple matter of law enforcement but instead engaged in the defense of racial hegemony and empire officers and gendarmes waged a constant struggle against escalating banditry the assault and murder of settlers and nationalist politics anticolonial violence that rejected french rule thus policing became synonymous with repression and its brutal tactics foreshadowed the torture and murder used during the war of independence to understand the mechanics of empire kalman argues that it was the first line of defense for imperial hegemony law order and empire outlines not only how failings in policing were responsible for decolonization in algeria but also how torture massacres and quotidian colonial violence introduced from the very beginning of french policing in algeria created state directed aggression from 1870 onward

Claiming the City 1993

as a product of its time the call centre utilises new developments in telecommunications and information technology to offer cost efficient delivery systems for customer care efficiency productivity and flexibility are all embodiments of neoliberal market capitalism and are all personified in the call centre operation as well as the structure of the labour market in general thus the individual and the workplace are embedded in a variety of global processes in order to frame the

context in which call centre operations exist today and their employees mainly young men and women negotiate the increasingly risky and individualised task of developing an identity or sense of belonging in the world labour markets and identity on the post industrial assembly line sets out the economic social and political changes over the last three decades that have restructured the labour market altered the balance between labour management and the state and unleashed global market capitalism upon previously sheltered areas of the economy and social life in both Britain and elsewhere this ground breaking book offers one of the first real qualitative sociological investigations of a relatively new form of employment to see what life is like on the post industrial assembly line whilst also taking a close look at the nature of class identity and subjectivity in relation to young people coming of age in a world dramatically altered over the last three decades
