population

specifically the elderly has become a main priority in society it is imperative to find ways to boost the longevity of healthcare services for all users sustainable health and long term care solutions for an aging population is a pivotal reference source featuring the latest scholarly research on issues pertinent to health cost and finding effective ways of financing healthcare for the elderly including coverage on a number of topics such as provider accreditation corporate social responsibility and data management this book is ideally designed for policy makers academicians researchers and advanced level students seeking current research on the innovative planning and development of healthcare conference report on solutions for child care problems in the usa defines the need for child care facilities under community responsibility considers various sources of financing describes successful experiences in child care programmes discusses arrangements for parent education role of business and social services transportation etc and includes recommendations and a directory of useful addresses list of participants references and statistical tables conference held in washington 1979 mar 7 and 8 diplomats politicians and activists alike have long laboured under the assumption that a two state solution is the only path to peace between the israelis and the palestinians but as this conflict continues unabated and violence and instability deepen it seems that the ideal of two states coexisting alongside each other and the ever elusive goal of peace slip further from reach the failure of the two state solution examines the impasse in the israel palestine conflict exploring the reasons behind the breakdown of attempts to establish a meaningful palestinian state this book therefore points to another until recently unthinkable option a single bi national state in israel palestine with all inhabitants sharing in equal rights and citizenship regardless of ethnicity or faith hani a faris has drawn together a wide ranging and in depth analysis of the historical and current situation in israel palestine by analysing the history of the conflict in israel palestine and its numerous peace initiatives this book demonstrates how the current deadlock has been reached with a nascent palestinian state hampered by israeli security policy and internal political divisions and the continuing expansion of the israeli settlements in the west bank it is argued here that the viability of the two state solution seems to have run its course and so highlights the one state solution as an option and debates and develops the organisational steps and strategies on a local and international level that would enable the construction of a bi national state with scholars from the us europe the arab world and israel analysing the possibility of a one state solution and the shortcomings of the two state track this is an important and ground breaking book for students of politics international relations peace studies and middle east studies and all interested in the resolution of this seemingly intractable conflict the montgomery bus boycott student nonviolent coordinating committee sncc and brown v board of education reveal incentives to reform as a result of economic political and legal threat it is difficult to change a person s heart or to change based on moral conviction alone however policies and laws can be established that will change a person s behavior historically there was rarely a time where societal changes were the result of a desire to do what was morally right doing what is right was contingent upon economic advantages political motivation or the threat of litigation by the mid 1900s the naacp had learned a valuable lesson in the south that litigation or the threat of litigation was an effective tool in the quest for educational equality douglas 1995 more recently the metoo movement and the los angeles teacher s strike exposed corrupt behavior and insufficient working environments that have existed for decades what is different they have been exposed through political economic and legal means as it pertains to educating african americans there was an ongoing role of servitude in the political economy of the south anderson 1988 this was subsequently disrupted through political economic and legal measures during reconstruction racist ideologies and economic advantages were seen through jim crow laws roback 1984 that were again disrupted through political economic and legal methods education has also been cited as what perpetuates our democracy it is institutions that afford its citizens the skills and knowledge necessary for political participation rury 2002 even when legal cases are unsuccessful such as puitt v commissioners of gaston county or plessy v ferguson they can forge the way to successful litigation dismantling racist ideologies that oppress african americans although the puitt decision did not remove the processes of discrimination against black schools it left intact the legal basis on segregated and unequal education douglas 1995 as citizens it is imperative that we participate in the political process and use our authority to mandate the changes we would like to see in urban education when theorizing this book the intent was to provide an interdisciplinary look at solutions to critical issues in urban education through political economic and legal avenues this book seeks to provide an interdisciplinary approach to solving the issues in education while connecting it to the effects on teacher preparation using historical and recent examples scholars can piece together solutions that will guide others to political economic and legal action necessary to dismantle systems that have bound black and brown children it is our intent to offer innovative yet grounded solutions that can purposefully move the conversation about solutions to critical issues in education to political economic and legal actions solution focused brief therapy by johnny s kim is the first book in the field to provide a practical overview of the essentials of solution focused brief therapy sfbt from a multicultural perspective including

intervention skills research applications and implications for practice case examples illustrate sfbt in action with a wide range of client populations in addition the book incorporates recommendations from the recently developed and approved sfbt treatment manual published by the solution focused brief therapy association covering applications to physics and engineering as well this relatively elementary discussion of algebraic equations with integral coefficients and with more than one unknown will appeal to students and mathematicians from high school level onward 1961 edition originally published by john wiley and sons in 1983 partial differential equations for scientists and engineers was reprinted by dover in 1993 written for advanced undergraduates in mathematics the widely used and extremely successful text covers diffusion type problems hyperbolic type problems elliptic type problems and numerical and approximate methods dover s 1993 edition which contains answers to selected problems is now supplemented by this complete solutions manual darwinism and the divine examines the implications of evolutionary thought for natural theology from the time of publication of darwin s on the origin of species to current debates on creationism and intelligent design questions whether darwin s theory of natural selection really shook our fundamental beliefs or whether they served to transform and illuminate our views on the origins and meaning of life identifies the forms of natural theology that emerged in 19th century england and how they were affected by darwinism the most detailed study yet of the intellectual background to william paley s famous and influential approach to natural theology set out in 1802 brings together material from a variety of disciplines including the history of ideas historical and systematic theology evolutionary biology anthropology sociology and the cognitive science of religion considers how christian belief has adapted to darwinism and asks whether there is a place for design both in the world of science and the world of theology a thought provoking exploration of 21st century views on evolutionary thought and natural theology written by the world renowned theologian and bestselling author the book offers insight into the healthcare system by exploring emerging technologies and ai based applications and implementation strategies it includes current developments for future directions as well as covering the concept of the healthcare system along with its ecosystem data centric ai solutions and emerging technologies in the healthcare ecosystem focuses on the mechanisms of proposing and incorporating solutions along with architectural concepts design principles smart solutions decision making process and intelligent predictions it offers state of the art approaches for overall innovations developments and implementation of the smart healthcare ecosystem and highlights medical signal and image processing algorithms healthcare based computer vision systems and discusses explainable ai xai techniques for healthcare this book will be useful to researchers involved in ai iot data and emerging technologies in the medical industry it is also suitable as supporting material for undergraduate and graduate level courses in related engineering disciplines advanced technologies for microfinance solutions and challenges is the first book to systematically address technology s impact on microfinance it discusses a wide variety of technology applications that will define the next generation of the microfinance movement and it addresses the tough questions surrounding technology in microfinance for instance what are the disadvantages of technology enabled microfinance and what will it mean for the inclusiveness and empowerment of the service this dynamic collection is a must have for anyone interested in microfinance whether you are a donor lender or investor waste management in lebanon is a significant issue anticipating cascading and spill over effect on livelihood environment and agriculture north lebanon has been experiencing population growth spurts due to humanitarian crises in neighbouring countries that contributes to the urgency of finding sustainable solutions adequate delivery of response measures is beyond the capacities of local authorities consequently waste crisis has reached its historical peaks it is unlikely that upcoming years can bring radical shifts related to the trends in rapidly increasing waste generation however the seemingly uncontrollable mechanisms should not lead to inaction but concentrated efforts should be stepped up to eliminate harmful consequences the project rehabilitation and waste management of el bared canal irrigation system to reduce source to sea pollution and improve livelihoods in the akkar region of lebanon financed by the government of norway has been formulated to ensure minimal discharges of waste from el bared system to the mediterranean sea thus improving the livelihoods of the people depending on the system through irrigation canal system rehabilitation solid waste disposal and improved agricultural output and job creation applying a pilot approach the project mainly focuses on akkar irrigation scheme to introduce both hard investment and soft measures in response to the waste crisis following a multi criteria assessment approach the current report maps waste removal technologies and provides recommendations on their functions and suitability in the context of the target area based on broader understanding of the feasibility it helps come to a decision on technology selection classic text deals primarily with measurement interpretation of conductance chemical potential and diffusion in electrolyte solutions detailed theoretical interpretations plus extensive tables of thermodynamic and transport properties 1970 edition this book written by global experts in the field provides a thorough overview on fertility and pregnancy challenges and solutions in women who are being or have been

treated for cancer the book addresses several topics including pregnancy outcomes after a cancer diagnosis the impacts of systemic anticancer therapy on fertility the essentials of fertility preservation approaches in cancer patients and fertility counseling this is in addition to controversial topics like the role of ovarian stimulation in breast cancer patients fertility preservation in cancer patients with brca mutation and the evolving role of gnrh analogues within this context key open questions are discussed with reference to the latest evidence the aim is to provide clinicians with a reliable resource that documents the most up to date knowledge on the feasibility and safety of the different approaches to fertility preservation and on the management of female cancer patients who would like to preserve fertility and achieve a pregnancy following their treatment
