in this book haridimos tsoukas one of the most imaginative organization theorists of our time examines the nature of knowledge in organizations and how individuals and scholars approach the concept of knowledge tsoukas firstly looks at organizational knowledge and its embeddedness in social contexts and forms of life he shows that knowledge is not just a collection of free floating representations of the world to be used at will but an activity constitutive of the world on the one hand the organization as an institutionalized system does produce regularities that can can be captured via propositional forms of knowledge on the other the organization as practice as a lifeworld or as an open ended system produce stories values and shared traditions which can only be captured by narrative forms of knowledge secondly tsoukas looks at the issue of how individuals deal with the notion of complexity in organizations our inability to reduce the behaviour of complex organizations to their constituent parts drawing on concepts such as discourse narrativity and reflexivity he adopts a hermeneutical approach to the issue finally tsoukas examines the concept of meta knowledge and how we know what we know arguing that the underlying representationalist epistemology of much of mainstream management causes many problems he advocates adopting a more discursive approach he describes what such an epistemology might be and illustrates it with examples from organization studies and strategic management an ideal introduction to the thinking of a leading organizational theorist this book will be essential reading for academics researchers and students of knowledge management organization studies management studies business strategy and applied epistemology

success or failure as a result it is able to contribute to discussions of identity politics and white fragility by presenting a clear picture of the existential stakes of allyship with this picture in hand we can better appreciate what challenges exist within the 21st century movement for racial justice and we can also learn something more fundamental about what it means to be a person in a contested conflictual social world
