a modern computer system that s not part of a network is even more of an anomaly today than it was when we published the first edition of this book in 1991 but however widespread networks have become managing a network and getting it to perform well can still be a problem managing nfs and nis in a new edition based on solaris 8 is a guide to two tools that are absolutely essential to distributed computing environments the network filesystem nfs and the network information system formerly called the yellow pages or yp the network filesystem developed by sun microsystems is fundamental to most unix networks it lets systems ranging from pcs and unix workstations to large mainframes access each other s files transparently and is the standard method for sharing files between different computer systems as popular as nfs is it s a black box for most users and administrators updated for nfs version 3 managing nfs and nis offers detailed access to what s inside including

how to plan set up and debug an nfs network using the nfs automounter diskless workstations pc nfs a new transport protocol for nfs tcp ip new security options ipsec and kerberos v5 diagnostic tools and utilities nfs client and server tuning nfs isn t really complete without its companion nis a distributed database service for managing the most important administrative files such as the passwd file and the hosts file nis centralizes administration of commonly replicated files allowing a single change to the database rather than requiring changes on every system on the network if you are managing a network of unix systems or are thinking of setting up a unix network you can t afford to overlook this book

CISSP Practice Questions Exam Cram 2 *2004-10-21*

explains in practical terms the basic capabilities and potential uses of xbee modules and gives engineers the know how that they need to apply the technology to their networks and embedded systems this book provides insight into the product data sheets it saves you time and helps you get straight to the information you need
