Rhetoric in 2Maccabees

from a religio historical perspective 2maccabees should be considered a watershed narrative one that describes the threat of hellenisation to traditional jewish religious society however by the time 2macc was written c 124 bce judaism had already been greatly hellenised and quite ironically the jewish opponents to hellenisation were deliberately employing greek rhetorical and literary competencies to combat supposedly iniquitous greek influences accordingly 2macc has intrigued scholars since at least the nineteenth century here research has variously focused on the grammatical historical approach 1891 to 1949 the socio economical approach 1959 to 1985 and the ubiquitous impact of hellenisation 1986 to 2012 the chapters in this book reflect post 2012 insights of nine prominent scholars dedicated to presenting some of the very latest findings in the context of 2macc research here they make use of some of the latest methods with particular emphasis on narratology and rhetoric this book which offers a wide spectrum of the latest theological insights into second temple judaism should be considered an essential source for serious biblical scholars

where was god in the sixth century destruction of jerusalem the hebrew bible compositions written during and around the sixth century bce provide an illuminating glimpse into how ancient judeans reconciled the major qualities of god as lord fierce warrior and often harsh rather than compassionate judge with the suffering they were experiencing at the hands of the neo babylonian empire which had brutally destroyed judah and deported its people voices from the ruins examines the biblical texts explicitly and directly contextualized by those catastrophic events kings jeremiah ezekiel lamentations and selected psalms to trace the rich diverse and often polemicized discourse over theodicy unfolding therein dalit rom shiloni shows how the voices from the ruins in these texts variously justified god in the face of the rampant destruction expressed doubt and protested god s action and inaction rather than trying to paper over the stark theological differences between the writings of these sixth century historiographers prophets and poets rom shiloni emphasizes the dynamic of theological pluralism as a genuine characteristic of the hebrew bible through these avenues and with her careful discerning textual analysis she provides readers with insight into how the sufferers of an ancient national catastrophe wrestled with the difficult question that has accompanied tragedies throughout history where was god

scholars of the hebrew bible used to look at prophecy and wisdom as clearly distinct realms represented by antagonistic and mutually exclusive roles of their central characters the loyal sage the pillar of administration on the one side and the rebellious prophet criticizing the establishment on the other while the influence of wisdom thought on prophetic texts has been a topic in the scholarly debate the complementary question of the influence of prophetic thought on wisdom texts has rarely been asked the contributions in this volume look at both questions they start from the assumption that texts from the hebrew bible and the cultures surrounding ancient israel all originated from a social stratum of educated scribes who authored and transmitted these texts it then seems plausible that wisdom texts might show similar traces of prophetic influence to those of wisdom thoughts found in prophetic texts the essays give a multifaceted picture concerning the mutual perception of prophets and sages and thus provide a deeper understanding of both wisdom literature and prophecy
