from equal ethical and empathic perspectives the book is designed to assist established researchers academics and students across disciplines who wish to incorporate novel arts and practice based research and critical approaches in their research projects artwork and academic writing providing both a consolidated understanding of the peripheries visual studies and artistic research as they are and setting expansive and new research insights and practices this book is essential reading for scholars of arts and humanities visual culture art history design philosophy and cultural studies how and why cities have become the predominant sites for revolutionary upheavals in the contemporary world examining the changing character of revolution around the world the revolutionary city focuses on the impact that the concentration of people power and wealth in cities exercises on revolutionary processes and outcomes once predominantly an urban and armed affair revolutions in the twentieth century migrated to the countryside as revolutionaries searched for safety from government repression and discovered the peasantry as a revolutionary force but at the end of the twentieth century as urban centers grew revolution returned to the city accompanied by a new urban civic repertoire espousing the containment of predatory government and relying on visibility and the power of numbers rather than arms using original data on revolutionary episodes since 1900 public opinion surveys and engaging examples from around the world mark beissinger explores the causes and consequences of the urbanization of revolution in the late twentieth and early twenty first centuries beissinger examines the compact nature of urban revolutions as well as their rampant information problems and heightened uncertainty he investigates the struggle for control over public space why revolutionary contention has grown more pacified over time and how revolutions involving the rapid assembly of hundreds of thousands in central urban spaces lead to diverse ad hoc coalitions that have difficulty producing substantive change the revolutionary city provides a new understanding of how revolutions happen and what they might look like in the future there is a lack of international comparative housing studies possibly because it requires thorough knowledge of the real estate market in question this book brings together scholars with knowledge of different national markets in order to facilitate comparisons for real estate and housing and urban studies scholars and practitioners by studying international markets using new data as well as new analysis of existing data the chapters in this book present insights into the institutional constraints on national housing markets specifically the contributors seek to examine the role of institutional factors and their influence on transaction costs in these markets exhibiting a diverse range of geographical legal and economic perspectives the countries are grouped together based on legal institutional similarities and each group includes an introduction and a conclusion highlighting similarities and differences from the institutional perspective the book is divided into 3 parts part i sets the theoretical context and the reasons for writing a book focusing on national housing markets part ii presents national markets from

the perspective of the transaction process and covers europe north and south america east asia the pacific and africa part iii contains conclusions with a critical discussion on how to compare national housing markets and a reflection on future directions of housing markets in an increasingly competitive international environment the routledge companion to international housing markets is essential reading for academics and professionals in housing studies real estate economics and urban studies a major new urban history of the design and development of postwar san francisco designing san francisco is the untold story of the formative postwar decades when u s cities took their modern shape amid clashing visions of the future in this pathbreaking and richly illustrated book alison isenberg shifts the focus from architects and city planners those most often hailed in histories of urban development and design to the unsung artists activists and others who played pivotal roles in rebuilding san francisco between the 1940s and the 1970s previous accounts of midcentury urban renewal have focused on the opposing terms set down by robert moses and jane jacobs put simply development versus preservation and have followed new york city models now isenberg turns our attention west to colorful pioneering and contentious san francisco where unexpectedly fierce battles were waged over iconic private and public projects like ghirardelli square golden gateway and the transamerica pyramid when large scale redevelopment came to low rise san francisco in the 1950s the resulting rivalries and conflicts sparked the proliferation of numerous allied arts fields and their professionals including architectural model makers real estate publicists graphic designers photographers property managers builders sculptors public interest lawyers alternative press writers and preservationists isenberg explores how these centrally engaged arts professionals brought new ideas to city regional and national planning and shaped novel projects across urban suburban and rural borders san francisco s rebuilding galvanized far reaching critiques of the inequitable competition for scarce urban land and propelled debates over responsible public land stewardship isenberg challenges many truisms of this renewal era especially the presumed male domination of postwar urban design showing how women collaborated in city building long before feminism s impact in the 1970s an evocative portrait of one of the world s great cities designing san francisco provides a new paradigm for understanding past and present struggles to define the urban future the retail market study 2014 of the location group is the one and only study of its kind with 150 of the most notable international cities of the fashion and retail world and 3 000 store openings on 1 500 pages over 1 000 retailers 800 shopping streets and 500 shopping centers were analyzed the study reached more than 100 000 readers worldwide so far sesame street has taught generations of americans their letters and numbers and also how to better understand and get along with people of different races faiths ethnicities and temperaments but the show has a global reach as well with more than thirty co productions of sesame street that are viewed in over 150 countries in recent years the united states agency for international development usaid has provided funding to the new york based sesame workshop to create international versions of sesame street many of these programs teach children to respect diversity and tolerate others which some hope will ultimately help to build peace in conflict affected societies in fact the u s government has funded local versions of the show in several countries enmeshed in conflict including afghanistan kosovo pakistan jordan and nigeria can big bird fight terrorism takes an in depth look at the nigerian version sesame square which began airing in 2011 in addition to teaching preschool level academic skills sesame square seeks to promote peaceful coexistence a daunting task in nigeria where escalating ethno religious tensions and terrorism threaten to fracture the nation after a year of interviewing sesame creators observing their production processes conducting episode analysis and talking to local educators who use the program in classrooms naomi moland found that this child focused use of soft power raised complex questions about how multicultural ideals translate into different settings in nigeria where segregation state fragility and escalating conflict raise the stakes of peacebuilding efforts multicultural education may be ineffective at best and possibly even divisive this book offers rare insights into the complexities challenges and dilemmas inherent in soft power attempts to teach the ideals of diversity and tolerance in countries suffering from internal conflicts peer reviewed journal of theater history and
