Blockchain Revolution

2018-06-12

the first foundational book on blockchain technology from the bestselling author of wikinomics don tapscott and blockchain expert alex tapscott now in paperback with a new preface and chapter explaining recent developments in the world of blockchain including cryptoassets icos smart contracts and more this book has had an enormous impact on the evolution of blockchain in the world satya nadella ceo microsoft corporation in this revelatory book don and alex tapscott bring us a brilliantly researched highly readable and essential book about the technology driving the future of the economy blockchain is the ingeniously simple revolution ary protocol that allows transactions to be simultaneously anonymous and secure by maintaining a tamperproof public ledger of value though it s best known as the technology that drives bitcoin and other digital cur rencies it also has the potential to go far beyond currency to record virtually everything of value to humankind from birth and death certifi cates to insurance claims land titles and even votes as with major paradigm shifts that preceded it blockchain technology will create winners and losers this book shines a light on where it can lead us in the next decade and beyond

Blockchain Revolution

2016-05-10

the first book to explain why blockchain technology will fundamentally change the internet what it does and how we use it over the past 30 years no theorist of the digital age has better explained the next big thing than don tapscott for example in wikinomics tapscott was the first to show how the internet provides the first global platform for mass collaboration now he writes about a profound technological shift that will change how the world does business and everything else using blockchain technology which powers the digital currency bitcoin the internet as we know it is great for collaboration and communication but is deeply flawed when it comes to commerce and privacy the new blockchain technology facilitates peer to peer transactions without any intermediary such as a bank or governing body keeping the user s information anonymous the blockchain validates and keeps a permanent public record of all transactions that means that your personal information is private and secure while all activity is transparent and incorruptible reconciled by mass collaboration and stored in code on a digital ledger with its advent we will not need to trust one another in the traditional sense because trust is built into the system itself although many opportunities for the blockchain require a digital currency bitcoin is only one application of this great innovation in computer science the blockchain can hold any legal document from deeds and marriage licences to educational degrees and birth certificates call it the world wide ledger it enables smart contracts decentralized autonomous organizations decentralized government services and transactions among things the internet of everything needs a ledger of everything the blockchain is a truly open distributed global platform that fundamentally changes what we can do online how we do it and who can participate tapscott writing with his son alex a financial analyst and technologist argues that the blockchain will shape the next era of prosperity in finance business healthcare education governance and beyond

SUMMARY - Blockchain Revolution: How The Technology Behind Bitcoin And Other Cryptocurrencies Is Changing The World By Don Tapscott And Alex Tapscott
