focusing on new reference sources published since 2008 and reference titles that have retained their relevance this new edition brings o
gorman s complete and authoritative guide to the best reference sources for small and medium sized academic and public libraries fully
up to date about 40 percent of the content is new to this edition containing sources selected and annotated by a team of public and
academic librarians the works included have been chosen for value and expertise in specific subject areas equally useful for both library
patrons and staff this resource covers more than a dozen key subject areas including general reference philosophy religion and ethics
psychology and psychiatry social sciences and sociology business and careers political science and law education words and languages
science and technology history and performing arts encompasses database products cd roms websites and other electronic resources in
addition to print materials includes thorough annotations for each source with information on author editor publisher cost format dewey
and lc classification numbers and more library patrons will find this an invaluable resource for current everyday topics librarians will
appreciate it as both a reference and collection development tool knowing it s backed by ala s long tradition of excellence in reference
selection

Services Marketing: People, Technology, Strategy (Eighth Edition)

2016-03-29

greenfield s neuropathology the worlds leading neuropathology reference provides an authoritative comprehensive account of the
pathological findings in neurological disease their biological basis and their clinical manifestations this account is underpinned
throughout by a clear description of the molecular and cellular processes and reactions that are relevant to the development and
normal and abnormal functioning of the nervous system while this scientific content is of paramount importance however care has been
taken to ensure that the information is presented in a way that is accessible to readers working within a range of disciplines in the
clinical neurosciences and that also places the neuropathological findings within the context of a broader diagnostic process the new
eighth edition incorporates much new information new illustrations and many new authors while retaining the depth breadth and quality
of content so praised in previous editions each chapter opens with an introductory section designed to offer an integrated approach to
diagnosis taking account of clinical manifestations neuroradiological and laboratory findings as well as the neuropathological and
molecular genetic features of the diseases being considered strong emphasis has been placed on facilitating the retrieval of
neuropathological information by non neuropathologists grappling with differential diagnoses or seeking information on broad categories
of neurological disease and boxes and tables are used to present important symptoms and signs patterns of disease and other features
for ease of reference high quality line and photographic illustrations the majority in full colour are available on a companion cd-rom
