the dynamics of powerful parenting is a book about power the power held by a parent to shape the development of a child and the power of a child to either accept or reject those efforts often when things are not working well for parents with their children they will continue doing the same things yet with ever more vigor usually the result will be more of the same only worse a secret to understanding the dynamics of many human behaviors lies in the paradox of the chinese finger puzzle aka chinese handcuff the chinese finger puzzle is a tube woven from bamboo shoots that is several inches long and about the diameter of a person s fingers true to its nature the tube will narrow as its ends are pulled thus when the tube is slipped over the ends of fingers or thumbs on opposing hands the subject s efforts to pull his or her fingers apart are met with increasing resistance from the device so it is with much of being human the thing that people wish to avoid most is the very thing that results from their efforts to do so dynamics is a book written with this paradox in mind it is a book of insights about parenting that turns upside down many of the things that are currently held dear in traditional parenting efforts it is a book that downplays the use of punishment but never overlooks the need for discipline and responsibility dynamics encourages parents to think about what they are doing how they are doing it and what are they are experiencing as a result then provides useful tools for changing undesired outcomes it is a book that can produce positive results that will benefit generations yet unborn
