Introduction to Health Services

1984

the seventh edition of introduction to health services builds upon its reputation as a classic book written by nationally recognized authors this new edition addresses the increasing pressure to improve the efficiency of the nations health care system and to provide an adequate level of health care for all americans the seventh edition reflects the revolutionary changes in the practice of clinical medicine government policy information technology and health care cost containment in depth information in the areas of health care finance health care access managed care and insurance and home health is also provided research and statistics throughout make this book the premier reference for understanding all the services that compose the health care landscape

The British National Health Service

1980

this book was originally conceived in 1987 it was then seen as a contribution towards improved management and policy making in a diffuse and neglected area of nhs management the focus of the book is the old community health services those transferred to area health authorities from local authorities in the 1974 re organization of the nhs these diverse services while grouped together had little objectively in common occupying as they do a hazy middle ground between hospital and family practitioner services however since 1974 there have been a number of major developments which have opened opportunities for change and development in these services these include the resurrection of concern with public health the attempted closure of large mental illness and mental handicap hospitals and the development of community care the introduction of general management and the implication for health and local authorities of the white papers caring for people promoting better health and working for patients traditionally community health services were seen as low status and a professional dead end this in turn has led to a rather uneven body of literature the growth of general management has led to a demand for a more coherent management orientated literature it is our hope that this book will encourage the production of more literature in this area

Public Health Service Publication

1952

research into the delivery and organisation of health care is a vital component in the improvement of health services a wide range of disciplines and methods needs to be deployed to address research questions in this field this unique reader brings together thirty examples of high quality sdo research using a range of disciplines including organisational studies epidemiology sociology history health economics anthropology and policy studies illustrating the use of qualitative and quantitative approaches and primary and secondary research expert editorial commentary on each section highlights different themes and methodological issues the reader covers six main areas of research organising services around the user user involvement in organising services workforce issues evaluating models of service delivery quality management and the management of change studying health care organisations this book is a companion volume to studying the organisation and delivery of health services research methods also published by routledge 2001 it makes top quality empirical and secondary research readily accessible to health service managers and health care professionals who are interested in research to health service researchers and to undergraduate and postgraduate students following courses in health and health management studies

Managing Community Health Services

1991
