class 12 chemistry ncert solutions 2023 24 the solutions have been especially designed to help the students write concise answers in the board examinations as well as prepare well for objective questions that the students face in jee and neet chapter 1 the solid state chapter 2 solutions chapter 3 electro chemistry

solved relative to solids and liquids how does air chegg Feb 07 2024

relative to solids and liquids how does air rank as a conductor of sound here s the best way to solve it created by chegg 100 1 rating share share 1 solids solids are the best conductors of sound view the full answer

solids and liquids physical chemistry varsity tutors Jan 06 2024

solids are characterized by tightly packed molecules in an organized manner whereas gases are characterized by greatly spread out molecules that are highly disordered liquids lie somewhere in the middle

washer method definition formula and volume of solids

Dec 05 2023

the washer method allows us to calculate the volume of the solid formed by rotating r along the x axis in fact the volume v can be expressed as shown below $v = \lim_{n \rightarrow \infty} \sum_{i=1}^n \pi (f(x_i))^2 \Delta x$ $\pi (a + b)^2 \Delta x$ this means that the solid formed by rotating the region

5 ways to calculate the volume of a prism wikihow Nov 04 2023

find the height let s say the height of the shape is 10 cm 4 multiply the area of the pentagonal base face times the height just multiply the area of the pentagonal base 105 cm^2 times the height 10 cm to find the volume of the regular pentagonal prism $13105 \text{ cm}^2 \times 10 \text{ cm} = 1050 \text{ cm}^3$

what are solids numerade Oct 03 2023

what are solids in physics solids are a collection of particles that are rigid the behavior of which can be described by the rules of quantum mechanics the particles in a solid are closely packed and fixed in place

heterogeneous mixture definition examples tutors com Sep 02 2023

common household heterogeneous mixtures include mixed nuts salad tacos pizza and mixed vegetables heterogeneous mixtures solid examples concrete is a heterogeneous mixture of crushed stone sand water and cement beach sand and soil are other examples
