Passionate Bureaucrat, The: Lessons For The 21st Century From 4,500 Years Of Public Service Reform

2018-06-28

effective and impartial public administration is the foundation of state legitimacy this was understood 4 500 years ago when urukagina the ruler of a small country in mesopotamia proclaimed the first known reform of public service the quality of public administration will be even more important in the 21st century successful states will be those that recognise public service as a key determinant of national competitive advantage that realisation will generate a radical change in the image of the civil servant from dull uninspired public official to passionate advocate of the common good this transformation will be the product of the complex challenges arising from the interweaving of globalisation with the 4th industrial revolution these and related developments are forcing governments around the world to search for public service that can respond to the unprecedented range of opportunities and threats emerging from a rapidly evolving international context in an increasingly frenetic world ruled by wicked ostriches and black elephants governments require a civil service capable of achieving five outcomes i unlocking the creativity and collaborative spirit needed to solve complex problems ii overcoming the fallacy that the private sector is inherently more innovative and efficient than the public service iii developing societies that are perceived by their citizens as fair iv fostering the trust of citizens in their governments and v bolstering the legitimacy of the state the author who is director of the united nations development programme s global centre for public service excellence in singapore suggests that these interconnected aims will result in a new phenomenon the public recognition by political leaders and citizens that future prosperity political stability environmental sustainability and social cohesion are dependent on committed and creative civil servants passionate about promoting the long term national interest i shall pass through this world but once any good therefore that i can do or any kindness that i can show to any human being let me do it now let me not defer or neglect it for i shall not pass this way again mahatma gandhi

Global Air Transport Management and Reshaping Business Models for the New Era

2022-05-27

the air transport industry is highly vulnerable to environmental changes as was seen when the recent covid 19 pandemic caused most airline operations to cease however for decades airlines have been collapsing around the globe as the business of managing airline operations has become stressed due to price competition this is detrimental to air carriers since air transport products and services are the same moreover it impacts other industries such as tourism hotels and restaurants which contribute to the derailment of economic and social activities thus it is essential to determine new practices and strategies that can allow air transport management to be enriched and to flourish global air transport management and reshaping business models for the new era provides a comprehensive collection of knowledge on the new era of business management on air transport it provides strategies technologies and tools used in the reshaping of the air transport business model covering topics such as customer experience robotic process automation and airline alliances this major reference work is an essential resource for airline managers supply chain specialists air transport managers students and faculty of higher education libraries researchers economists government officials and academicians

the u s military has a stockpile of approximately 400 000 tons of excess obsolete or unserviceable munitions about 60 000 tons are added to the stockpile each year munitions include projectiles bombs rockets landmines and missiles open burning open detonation ob od of these munitions has been a common disposal practice for decades although it has decreased significantly since 2011 ob od is relatively quick procedurally straightforward and inexpensive however the downside of ob and od is that they release contaminants from the operation directly into the environment over time a number of technology alternatives to ob od have become available and more are in research and development alternative technologies generally involve some type of contained destruction of the energetic materials including contained burning or contained detonation as well as contained methods that forego combustion or detonation alternatives for the demilitarization of conventional munitions reviews the current conventional munitions demilitarization stockpile and analyzes existing and emerging disposal treatment and reuse technologies this report identifies and evaluates any barriers to full scale deployment of alternatives to ob od or non closed loop incineration combustion and provides recommendations to overcome such barriers

Alternatives for the Demilitarization of Conventional Munitions

2024-04-26

neurogenetics is a growing field providing a clear link between clinical characteristics of phenotypes and exact molecular tests to reach a specific diagnosis neurogenetics for the practitioner provides clinicians with a navigation tool to help diagnose and treat patients with neurological disorders using neurogenetics the first section introduces the reader to an overview of genetic principles including practical applications in relation to diagnosis and current limitations additional chapters highlight how to workup patients presenting with certain features including cerebral palsy intellectual disability congenital muscular dystrophy cognitive decline dementia peripheral neuropathy and paroxysmal disorder the final section explores therapeutic strategies based on genetic interventions and genetic counselling options internationally contributed this book will become the essential reference guide for neurologist reviews genetic testing for diagnostic confirmation including carrier testing and prenatal diagnosis explores various therapeutic strategies based on genetic interventions discusses when a neurologic problem may have an underlying genetic cause

Neurogenetics for the Practitioner

the work of environmental educators and activists in india and south africa offers new models for schooling and environmental activism education has never played as critical a role in determining humanity s future as it does in the anthropocene an era marked by humankind s unprecedented control over the natural environment drawing on a multisited ethnographic project among schools and activist groups in india and south africa peter sutoris explores education practices in the context of impoverished marginal communities where environmental crises intersect with colonial and racist histories and unsustainable practices he exposes the depoliticizing effects of schooling and examines cross generational knowledge transfer within and beyond formal education finally he calls for the bridging of schooling and environmental activism to find answers to the global environmental crisis the onset of the anthropocene challenges the very definition of education and its fundamental goals says sutoris researchers must look outside conventional models and practices of education for inspiration if education is to live up to its responsibilities at this critical time for decades environmental activist movements in some countries have wrestled with questions of responsibility and action in the face of environmental destruction they inhabited the mental world of the anthropocene before much of the rest of the world sutoris highlights an innovative research methodology of participatory observational filmmaking describing how films made by children in the indian and south african communities provide a window into the ways that young people make sense of the future of the anthropocene it is through their capacity to imagine the world differently sutoris argues that education can reinvent itself

Two for the Price of One – Effects and Underlying Mechanisms of Combined Motor-Cognitive Interventions on the Body and the Brain

1848

conservation physiology for the anthropocene a systems approach volume 39a in the fish physiology series is a comprehensive synthesis on the physiology of fish in the anthropocene this volume closes the knowledge gap by considering the many ways in which different physiological systems e g sensory physiology endocrine cardio respiratory bioenergetics water and ionic balance and homeostasis locomotion biomechanics gene function and physiological diversity are relevant to management and conservation as the world is changing with a dire need to identify solutions to the many environmental problems facing wild fish populations this book comprehensively covers conservation physiology and its future techniques conservation physiology reveals the many ways in which environmental change and human activities can negatively influence wild fish populations these tactics inform new management and conservation activities and help create the necessary conditions for fish to thrive presents authoritative contributions from an international board of authors each with extensive expertise in the conservation physiology of fish provides the most up to date information on the ways in which different physiological systems are relevant to the management and conservation of fish and fisheries identifies how anthropogenic stressors perturb physiological systems explores how different physiological systems can be exploited to solve conservation problems

Annual Report of the Federal Home Loan Bank Board for the Calendar Year

1874

social inclusion is a pressing issue confronting all levels of sport today and community sport in particular sport is being promoted as an inclusive environment in which people of all backgrounds and abilities can participate and access a range of social and health benefits moreover sport is often heralded as a vehicle for promoting social inclusion in other societal domains yet the policy ideal of sport for all is not always realised in practice and community sport continues to be plagued by various forms of discrimination and social exclusion this book brings together a team of scholars from across the globe whose research addresses the complex relationship between community sport and social inclusion their contributions critically examine the dynamics of inclusion exclusion in community sport as well as the broader outcomes and

impacts that sports programmes may have in promoting or hindering social inclusion in other areas of life such as employment education and migrant integration this book will be of interest to academics researchers and advanced students of sport sociology politics social work and public policy the chapters in this book were originally published as a special issue of sport in society

Reports of Cases Heard and Determined by the Lord Chancellor and the Court of Appeal in Chancery [1862-1865]

2016-12-06

as academics in postcolonial caribbean countries we have been trained to believe that research should be objective a measurable benefit to the public good and quantifiable in nature so as to generalize findings to develop knowledge societies for economic growth what happens however when the very word research connotes a derogatory term or semblance of distrust smith 1999 speaks towards the distrustful nature of the term as a legacy of european imperialism and colonialism against this backdrop how do caribbean researchers leverage recognized and valued indigenous methods of knowing and understanding for and by the caribbean populace how do we learn from indigenous research methods such as kaupapa maori smith 1999 and develop an understanding of research that is emancipatory in nature decolonizing qualitative methods are rooted in critical theory and grounded in social justice resistance change and emancipatory research for and by the other said 1978 rodney s 1969 legacy of groundings provides a caribbean oriented ethnographic approach to collecting data about people and culture it is an anti imperialist method of data collection focused on the socioeconomic and political environment within the post colonial context similar to rodney other critical caribbean scholars have moved the research discourse to center on the notions of resistance struggle chevannes 1995 feraria 2009 and decolonizing methodologies this proposed edited volume will provide a collective body of scholarship for innovative uses of decolonizing qualitative research in order to theorize and conduct decolonizing research one can argue that the researcher as self and as the other needs to be interrogated borrowing from an autoethnographic ontology the researcher or investigator recognizes the self as the unit of measure and there is a concerted effort to continuously see the self seeing the self through and as the other alexander 2005 ellis 2004 this level of interrogation may require frameworks such as reasonable humanism in which there is a clear understanding of the role of the researcher and researched from a physiological and psychosocial standpoint thereafter the researcher is better prepared to enter into a discourse about decolonizing methodologies the origins of qualitative inquiry in the caribbean can be traced to political and economic discourses marxism postcolonialism neocolonialism capitalism liberalism postmodernism which have challenged ways of knowing and the construction of knowledge evans 2009 traced the origins of qualitative inquiry to slave narratives proprietor s journals missionaries reports and travelogues common to the caribbean is an understanding of how colonial legacies of research have ridiculed oral traditions language and ways of knowing often rendering them valueless and inconsequential this proposed edited volume acknowledges the significance of decolonizing approaches to qualitative research in the caribbean and the wider caribbean diaspora it includes an audience of scholars teacher researchers and students primarily in and across the humanities social sciences and educational studies this proposed volume would provide much needed knowledge and best practice strategies to the community of researchers engaged in decolonizing methodologies additionally this volume will allow readers to think of new imaginings of research design that deconstruct power and privilege to benefit knowledge communities and participants it will spark key objectives directions and frameworks for deeper discussions and interrogations of normative westernized and hegemonic approaches to qualitative research lastly the volume will welcome empirical studies of application of decolonizing methodologies and theoretical studies that frame critical discourse

The Glass Universe

1819

liberal left orthodoxy holds that brexit is a disastrous coup orchestrated by the hard right and fuelled by xenophobia which will break up the union and turn what s left of britain into a neoliberal dystopia richard tuck s ongoing commentary on the brexit crisis demolishes this narrative he argues that by opposing brexit and throwing its lot in with a liberal constitutional order tailor made for the interests of global capitalists the left has made a major error it has tied itself into a framework designed to frustrate its own radical policies brexit therefore actually represents a golden opportunity for socialists to implement the kind of economic agenda they have long since advocated sadly however many of them have lost faith in the kind of popular revolution that the majoritarian british constitution is peculiarly well placed to deliver and have succumbed instead to defeatism and the cultural politics of virtue signalling another approach is however still possible combining brilliant contemporary political insights with a profound grasp of the ironies of modern history this book is essential for anyone who wants a clear sighted assessment of the momentous

underlying issues brought to the surface by brexit

The Gentleman's Magazine, and Historical Chronicle, for the Year ...

1987

an unprecedented analysis of the crucial but underexplored roles the united states and other nations have played in shaping syria s ongoing civil war one of the best informed and non partisan accounts of the syrian tragedy yet published patrick cockburn independent syria s brutal long lasting civil war is widely viewed as a domestic contest that began in 2011 and only later drew foreign nations into the fray but in this book christopher phillips shows the crucial roles that were played by the united states russia iran saudi arabia turkey and qatar in syria s war right from the start phillips untangles the international influences on the tragic conflict and illuminates the west s strategy against isis the decline of u s power in the region and much more originally published in 2016 the book has been updated with two new chapters

Final Environmental Impact Statement for the Suppression of the Southern Pine Beetle

1898

the main objective of this book is to provide a multidisciplinary overview of methodological approaches architectures platforms and algorithms for the realization of an internet of things iot based smart urban ecosystem sue moreover the book details a set of real world applications and case studies related to specific smart infrastructures and smart cities including structural health monitoring smart urban drainage networks smart grids power efficiency healthcare city security and emergency management a smart urban ecosystem sue is a people centric system of systems that involves smart city environments applications and infrastructures sues require the close integration of cyber and physical components for monitoring understanding and controlling the urban environment in this context the internet of things iot offers a valuable enabling technology as it bridges the gap between physical things and software components and empowers cooperation between distributed pervasive and heterogeneous entities
