In October 1957, screen gems made numerous horror movies available to local television stations around the country as part of a package of films called Shock Theater. These movies became a huge sensation with TV viewers, as did the horror hosts who introduced the films and offered insight, often humorous, into the plots, the actors, and the directors. This history of hosted horror walks readers through the best TV horror films, beginning with the 1930s black and white classics from Universal Studios and ending with the grislier color films of the early 1970s. It also covers and explores the horror hosts who presented them, some of whom faded into obscurity while others became iconic within the genre.

Shepherd's Warning, Shepherd's Delight: is a book of poetry describing Patrick Mccluskie's walk from a lost place of belief in the abstract, as God, where taking control of one's destiny is a matter of will and application to a broken and then healed place before the personal God of Christianity. Turmoil became calm, calm became turmoil, backwards and forwards, as the understanding of self and the acceptance of grace gently and gradually drew him to the feet of God, to the foot of the cross, the realization that the Bible is God's word brings both relief and challenge. It is no neutral document; it demands a choice. It is both our greatest obstacle and our highest desire, as we delight in it and weep before it, clinging to the hope that is Jesus, our Shepherd, in the enchanting town of Ravenswood, where cosmic energies intertwine with earthly existence. Journalist Sarah Lancaster stumbles upon a cosmic revelation that shatters the boundaries between reality and the unseen, as shadows encroach upon the cosmic haven. Sarah becomes the cosmic custodian of a celestial artifact that holds the key to cosmic mysteries. Eternal Nightfall invites you on a cosmic odyssey where ancient prophecies and cosmic secrets unravel in a cosmic dance between the cosmic and the mundane. Sarah and a fellowship of cosmic protectors must navigate the delicate balance between cosmic forces and unearth the celestial artifact's true cosmic purpose as cosmic constellations align. Ravenswood stands at the cosmic crossroads of its destiny, prepare for a cosmic journey where the celestial meets the earthly, where cosmic shadows whisper untold secrets, and where the legacy of Eternal Nightfall unfolds in cosmic hues beyond the cosmic veil built around 1200 and now a UNESCO World Heritage site that draws more than a million visitors and pilgrims each year.

Chartres Cathedral is one of the jewels of Western Civilization. How Chartres Cathedral and its priceless stained glass today, the largest such collection in one location, survived World War II's widespread destruction of cultural monuments is one of the great stories of recent history. Saving the Light at Chartres begins half a decade before World War II when a young French architect developed a plan to save the cathedral's precious stained glass as war engulfed Europe. In the fall of 1939, master glass artisans dismantled the hundreds of windows, and soldiers, tradesmen, and laborers with local volunteers crated thousands of glass panels, stowed them in the crypt, and months later, just before German invaders reached Chartres, hauled them across the country to an underground quarry. This effort to save the stained glass is but a prologue. By August 1944, the U.S. Army had broken out of Normandy and was racing across France toward Paris, and the Seine, Chartres became a key battleground. Allied bombing blew out the cathedral's temporary window coverings, and when the Americans, assisted by French Resistance fighters, entered the city in the face of unexpectedly heavy defiance and snipers in the cathedral, many soldiers believed German artillery spotters were occupying the cathedral's spires. When Colonel Welborn Griffith Jr., a senior operations officer of Twentieth Corps in Patton's Third Army, arrived, some were pressing to countermand the Army's standing order to avoid the cathedral and threatened to destroy it to neutralize the German spotters. Griffith was skeptical; he inspected the cathedral himself, climbed its towers, but found no Germans, so he rang the bell, waved an American flag, and ordered that the cathedral be spared, saving it from destruction. Griffith would be killed later that day. Victor Pollak tells both stories: the rescue of the windows and Colonel Griffith's fateful role in a compelling narrative. Saving the Light at Chartres honors the government and local teams who saved the windows, the Resistance that performed a vital role in the liberation of Chartres, Welborn Griffith, and the enduring treasure that is Chartres Cathedral. slayer myra hindley to honeymoon killer martha beck to the sensational cult of aileen wournos the first female serial killer as celebrity to cult killers homicidal missionaries and our pop culture and settle in for a wicked good read ruth dunne has been a writer since she was 14 years old and has written several novels this volume deals primarily with absentology an ontological and social scientific epistemological mode dedicated to the analysis of absence the book is drawn by manifestations of absence wherever they may be encountered it deals with three terms the shadow economy corruption and pollution while constructing a non realist ontology predicated upon the emptiness of all predicates as expounded by certain strands of hindu and buddhist philosophy according to the absentological viewpoint there is nothing outside beyond below or above relations relations exist on their own enchained within an immense infinite regress opening and closing upon one another absentology is by consequence of its nonattachment to phenomena a form of social inquiry fundamentally alien to each and every social form and it abandons any illusions about the possibility of an escape from the realm of relationality this book will appeal to students and academics interested in ontological philosophy melancholy and the archive examines how trauma history and memory are represented in key works of major contemporary writers such as david mitchell paul auster haruki murakami and jose saramago the book explores how these authors construct crucial relationships between sites of memory the archive becomes a central trope here and the self that has been subjected to various traumas various losses the archive be it a bureaucratic office saramago an underground bunker auster a geographical space or landscape mitchell or even a hole murakami becomes the means by which the self attempts to preserve and conserve his or her sense of history even as the economy of trauma threatens to erase the grounds of such preservation as the subject or self is threatened so the archive becomes a fetishized site wherein history is housed accommodated created even fabricated the archive in freudian terms becomes a space of melancholy precisely as the subject preserves not only a personal history or a culture s history but also the history of the traumas that necessitates the creation of the archive as such a detailed study of three major naval operations of world war ii these three initiated by imperial japan took place in the pacific and resulted in the battles of the coral sea midway aleutians and the philippine sea all the cases provide ample background on the geographic and strategic context of the operations as well as an account of the unfolding of the action utilizing much primary source material in especially american and japanese archives provided by publisher pope francis the last pope reveals the possible reasons for the choice of historical by great tribulation it also explores the recent scandals in the catholic church and addresses questions including what pressures decreed the end of the pontificate of benedict xvi what powers have an interest for the church to end and what is the relationship between the vatican and the new world order perfect for anyone interested in prophecies about the end times pope francis the last pope reveals the truth about what numerology says about the last pope and the darkness that may follow him as well as fascinating investigations into the gay lobby freemasonry and the jesuit agenda in the built around 1200 and now a unesco world heritage site that draws more than a million visitors and pilgrims each year chartres cathedral is one of the jewels of western civilization how chartres cathedral and its priceless stained glass today the largest such collection in one location survived world war ii s widespread destruction of cultural monuments is one of the great stories of recent history saving the light at chartres begins half a decade before world war ii when a young french architect developed a plan to save the cathedral s precious stained glass as war engulfed europe in the fall of 1939 master glass artisans dismantled the hundreds of windows and soldiers tradesmen and laborers with local volunteers crated thousands of glass panels stowed them in the crypt and months later just before german invaders reached chartres hauled them across the country to an underground quarry this effort to save the stained glass is but a prologue by august 1944 the u s army had broken out of normandy and was racing across france toward paris and the seine chartres became a key battleground allied bombing blew out the cathedral s temporary window coverings and when the americans assisted by french resistance fighters entered the city in the face of unexpectedly heavy defiance and snipers in the cathedral many soldiers believed german artillery spotters were occupying the cathedral s spires when colonel welborn griffith jr a senior operations officer of twentieth corps in patton s third army arrived some were pressing to countermand the army s standing order to avoid the cathedral and threatened to destroy it to neutralize the german spotters griffith was skeptical he inspected the cathedral himself climbed its towers but found no germans so he rang the bell waved an american flag and ordered that the cathedral be spared saving it from destruction griffith would be killed later that day victor pollak tells both stories the rescue of the windows and colonel griffith s fateful role in a compelling narrative saving the light at chartres honors the government and local teams who saved the windows the resistance that performed a vital role in the liberation of chartres welborn griffith and the enduring treasure that is chartres cathedral

there are two ages in the history of television before hbo and after hbo before the launch of home box office in 1972 the industry had changed little since the birth of broadcast network television in the late 1940s the arrival of the premium cable channel began a revolution in the business and programming of tv for the generation that has grown up with the vast array of viewing choices available today it is almost inconceivable that our ever expanding media universe began with a few hours of unimpressive programming on a single cable channel written by an insider this is the story of hbo s reconfiguration of television and the company s continual reinvention of itself in a competitive and dynamic industry

this volume deals primarily with absentology an ontological and social scientific epistemological mode dedicated to the analysis of absence the book is drawn by manifestations of absence wherever they may be encountered it deals with three terms the shadow economy corruption and pollution while constructing a non realist ontology predicated upon the emptiness of all predicates as expounded

by certain strands of hindu and buddhist philosophy according to the absentological viewpoint there is nothing outside beyond below or above relations relations exist on their own enchaind within an immense infinite regress opening and closing upon one another absentology is by consequence of its nonattachment to phenomena a form of social inquiry fundamentally alien to each and every social form and it abandons any illusions about the possibility of an escape from the realm of relationality this book will appeal to students and academics interested in ontological philosophy

melancholy and the archive examines how trauma history and memory are represented in key works of major contemporary writers such as david mitchell paul auster haruki murakami and jose saramago the book explores how these authors construct crucial relationships between sites of memory the archive becomes a central trope here and the self that has been subjected to various traumas various losses the archive be it a bureaucratic office saramago an underground bunker auster a geographical space or landscape mitchell or even a hole murakami becomes the means by which the self attempts to preserve and conserve his or her sense of history even as the economy of trauma threatens to erase the grounds of such preservation as the subject or self is threatened so the archive becomes a fetishized site wherein history is housed accommodated created even fabricated the archive in freudian terms becomes a space of melancholy precisely as the subject preserves not only a personal history or a culture s history but also the history of the traumas that necessitates the creation of the archive as such
