 the candidate in this examination toc solved paper official practice  
 sets 1 30 a second year calculus text this volume is devoted primarily  
 to topics in multidimensional analysis concepts and methods are  
 emphasized and rigorous proofs are sometimes replaced by relevant  
 discussion and explanation because of the author s conviction that the  
 differential provides a most elegant and useful tool especially in a  
 multidimensional setting the notion of the differential is used  
 extensively and matrix methods are stressed in the study of linear  
 transformations the first three chapters offer introductory material  
 on functions and variables differentials and vectors in the plane  
 succeeding chapters examine topics in linear algebra partial  
 derivatives and applications as well as topics in vector differential  
 calculus the final chapters explore multiple integrals in addition to  
 line and surface integrals exercises appear throughout the text and  
 answers are provided making the book ideal for self study john bird s  
 approach to mathematics based on numerous worked examples supported by  
 problems is ideal for students of a wide range of abilities theory is  
 kept to a minimum with the emphasis firmly placed on problem solving  
 skills making this a thoroughly practical introduction to the  
 mathematics engineering students need to master the book presents a  
 logical topic progression rather than following the structure of a  
 particular syllabus and is suitable for all level 3 vocational  
 students and first year undergraduates in engineering however coverage  
 has been carefully matched to the mathematics units within the 2007  
 btec national specifications in this fifth edition new material on  
 inequalities and differentiation of parametric equations implicit and  
 logarithmic functions as well as an introduction to differential  
 equations has been added the book now also includes two new revision  
 tests and even more problems for students to work through additional  
 chapters on linear correlation linear regression and sampling and
