the ancient city of rome was the site of daily activities as well as famous historical events it was not merely a backdrop but rather an active part of the experiences of its inhabitants shaping their actions and infusing them with meaning during each period in rome s imperial history her emperors also used the city as a canvas to be painted on transforming it according to their own ideals or ambitions rather than being organized by sites or monuments rome a sourcebook on the ancient city is divided into thematic chapters at the intersection of topography and socio cultural history this volume examines the cultural and social significance of the sites of ancient rome from the end of the republic in the age of cicero and julius caesar to the end of the fourth century drawing on literary and historical sources this is not simply a tour of the baths and taverns the amphitheatres and temples of ancient rome but rather a journey through the city that is fully integrated with roman society

a comprehensive analysis of the issues involved in planning for and facilitating successful street commerce street commerce has gained prominence in urban areas where demographic shifts such as increasing numbers of single people and childless empty nesters along with technological innovations enabling greater flexibility of work locations and hours have changed how people shop and dine out contemporary city dwellers are demanding smaller scale stores located in public spaces that are accessible on foot or by public transit at the same time the emergence of online retail undermines both the dominance and viability of big box discount businesses and drives brick and mortar stores to focus as much on the experience of shopping as on the goods and services sold meanwhile in many developing countries the bulk of urban retail activity continues to take place on the street even as new car oriented shopping centers are on the rise in light of such trends street commerce will play an important role in twenty first century cities particularly in producing far reaching benefits

for the environment and local communities although street commerce is deeply intertwined with myriad contemporary urban visions and planning goals walkability quality of life inclusion equity and economic resilience it has rarely been the focus of systematic research and informed practice in street commerce andres sevtsuk presents a comprehensive analysis of the issues involved in implementing successful street commerce drawing on economic theory urban design principles regulatory policies and merchant organization models he conceptualizes key problems and offers innovative solutions he provides a range of examples from around the world to detail how different cities and communities have bolstered and reinvigorated their street commerce according to sevtsuk successful street commerce can only be achieved when the private sector urban policy makers planners and the public are equipped with the relevant knowledge and tools to plan and regulate it
