

Proceedings of the Eighth International Conference on Management Science and Engineering Management 2014-05-06 this is the proceedings of the eighth international conference on management science and engineering management icmsem held from july 25 to 27 2014 at universidade nova de lisboa lisbon portugal and organized by international society of management science and engineering management ismsem sichuan university chengdu china and universidade nova de lisboa lisbon portugal the goals of the conference are to foster international research collaborations in management science and engineering management as well as to provide a forum to present current findings a total number of 138 papers from 14 countries are selected for the proceedings by the conference scientific committee through rigorous referee review the selected papers in the first volume are focused on intelligent system and management science covering areas of intelligent systems decision support systems manufacturing and supply chain management

□□□□□□□□□□ 1909 a key topic of many technical discussions has been the development of alternative fuels to power the compression ignition engine reasons for this include the desire to reduce the dependency on petroleum based fuel and at the same time to reduce the particulate

matter pm and nox emissions also there has been interest generated in the diesel engine because of the reduction in greenhouse gases that has been proposed during the 2008 2012 time frame in europe and the regulations that affect diesel engines in the united states
