in this book her follow up to the bestseller discipline without damage dr lapointe advises new parents how to put their child on a path to optimal development during the crucial early years the baby and toddler years are the most important period for any child's emotional and psychological development

parents naturally want to do what's best for their kids but they often struggle to know what that is especially when dealing with the big battlegrounds of sleep feeding and managing aggression the latest scientific research indicates that it is through a strong and stable sense of connection to their parents that children learn how to regulate their emotions master social skills and develop a sense of identity unfortunately many of the currently accepted parenting practices and traditional attitudes disrupt healthy connection rather than foster it leading to behavioral issues and emotional problems that can last into adulthood dr lapointe helps parents to understand how mindful and conscious parenting can help them to avoid passing unhealthy patterns down from one generation to the next rooted in compassion and understanding parenting right from the start shows parents how to build a firm caring presence in the early years that a child can lean into for a lifetime

201 questions to ask your kids do you have trouble talking to your kids does a successful conversation with your child consist of one word responses or abrupt physical acknowledgments does your son or

daughter get upset at the most innocent questions join the club unfortunately communicating well with kids is something every parent desires but few achieve we love our children but talking to them in a meaningful manner isn't always easy the questions in this book are designed to help no matter what age or sex your children no matter how many children you have no matter how good or bad your current parent child relationship this simple game will get your family talking more and when you're talking really talking about emotions and fears and attitudes you'll be learning about each other as individuals and growing closer together as a group an introduction for kids wouldn't it be fun to find out more about what your father or mother was like when he or she was a kid or get to tell your parents which of their friends you think looks dorkiest wouldn't conversation be more interesting if you and your family traded unexpected questions and answers at dinner rather than just talked about what homework did or didn't get done there are a lot of great things to talk about that no one ever brings up because we usually think conversation is serious rather than a way of being playful of course conversation should be about serious things some of the time some of the questions in this book are about very serious topics but other times questions should be asked just to create new ways to think about things look back on our lives or imagine what life would be like if we could design in any way we wanted in fact I wrote this book because I think talking can be terrific fun and even talking to your parents and brothers or sisters can be a kind of great game everyone can get to know each other and laugh a lot and be amazed from time to time no one wins or loses but there is an element of surprise in finding out personal information about parents and sharing some of your ideas daydreams and opinions with them my idea is to think of some of the world's most interesting questions that parents and kids could talk about and give everyone the chance to pick the ones they'd like to hear about each person picks a question to ask and then answers a question when his or her turn comes around all you have to do is choose from the list under 201 questions to ask your parents and ask any question you want your parents can take as long or as short a time they want to answer any you can all discuss the topic if you like but then they go into their section of the book and ask you questions some of them might not be so interesting but others like asking you who is the meanest kid you know might be cool to think about and share with them they'll learn a lot about what you think are ways kids act nasty you can wiggle out of any two questions that don't interest you or are embarrassing but no more than that it's good if a question makes you squirm a little that means you either haven't thought about it before or you have but you haven't wanted to deal with it but why not try out and answer pick a set length of time to play for and my guess is you'll want to extend it these questions get addictive you can play them at the dinner table or after dinner or on a car trip or anytime you feel like hearing what your parents say about something so this is a book about how to have interesting and often funny conversations with your family it's a way to avoid dead boring silences and fill the time instead with questions and answers that everyone will enjoy thinking about I know that in my family it is too easy for us to get stuck talking about practical things like who has to be taken where the next day that isn't particularly fun it doesn't let me in on what my kids are thinking and it doesn't help my two teenagers learn things that might help them understand me a little better an ingenious book that speaks to both parents and their kids 201 questions to ask your kids 201 questions to ask your parents is two books in one open it from one side and it provides parents with 201 questions for their children intended to spark discussion help reveal who their children really are and help children think about themselves and the world in new and useful ways turn it over and there are 201 questions children can ask back to their parents devised as an interactive game this is a book that can get any family talking really talking about facts and fears and attitudes an ingenious book that speaks to both parents and their kids 201 questions to ask your kids 201 questions to ask your parents is two books in one open it from one side and it provides parents with 201 questions for their children intended to spark discussion help reveal who their children really are and help children think about themselves and the world in new and useful ways turn it over and there are 201 questions children can ask back to their parents devised as an interactive game this is a book that can get any family talking

for over fifty years author Molly Brown Koch has been working with parent groups advocating that mothers and fathers reconnect with their own intuition and learn to trust their judgment while at the same time relying on the experts for their knowledge of child development. This two-pronged approach enables parents to recognize which behaviors stem from their own children's personalities and which are normal stages all children go through. Ms. Koch explains it was clear we were all making mistakes, big ones, little ones, silly ones, serious ones, but it was also clear that we made them inadvertently. We simply didn't know that many of our well-intentioned actions could have unwanted results. Careful listening has enabled the author to formulate a list of key secrets to raising amazing children. The 27 secrets in this book contain insights that will help parents recognize actions that can turn out to be mistakes, how and why they are mistakes, how they affect children and how they can be avoided. It explains how parents from many backgrounds have been able to adapt the ideas presented here to make the relationships with their children close and honest, enjoyable and satisfying, rewarding and above all, lasting, by combining the collective wisdom that grew out of their wide range of experiences and feelings with a new philosophy of parenting and two eye-opening definitions of respect. Parents will not just raise their children; they will uplift them and in the process be themselves uplifted.
