1977 benchmark film music a neglected art to treat music for motion pictures as a compositional style worthy of serious study through extensive and unprecedented analyses of the original concert scores it is the first to offer both aspiring composers and music educators with a view from the inside of the actual process of scoring to picture the core thesis of scoring the screen is that music for motion pictures is indeed a language developed by the masters of the craft out of a dramatic and commercial necessity to communicate ideas and emotions instantaneously to an audience like all languages it exists primarily to convey meaning to quote renowned orchestrator conrad pope who has worked with john williams howard shore and alexandre desplat among others if you have any interest in what music means in film get this book andy hill is among the handful of penetrating minds and ears engaged in film music today
