providing a concise but comprehensive overview of Joseph B. Soloveitchik's larger philosophical program, this book studies one of the most important modern Orthodox Jewish thinkers. It incorporates much relevant biographical, philosophical, religious, legal, and historical background so that the content and difficult philosophical concepts are easily accessible. The volume describes his view of Jewish law (Halakha) and how he takes the view to answer the fundamental question of Jewish philosophy: the question of the reasons for the commandments. It shows how numerous of his disparate books, essays, and lectures on law-specific commandments and Jewish religious phenomenology can be woven together to form an elegant philosophical program. It also provides an analysis and summary of Soloveitchik's views on Zionism and on interreligious dialogue and the contexts for Soloveitchik's respective stances on two issues that were pressing in his role as a leader of a major branch of post-war Orthodox Judaism. The book provides a synoptic overview of the philosophical works of Joseph B. Soloveitchik. It will be of interest to historians and scholars studying neo-Kantian philosophy, Jewish thought, and philosophy of religion.

This is the first book to bring together the major essays and lectures of Leo Strauss in the field of modern Jewish thought. It contains some of his most famous published writings as well as significant writings which were previously unpublished, spanning almost 30 years of continuously deepening reflection. The book presents the full range of Strauss's contributions as a modern Jewish thinker. These essays and lectures also offer Strauss's mature considerations of some of the great figures in modern Jewish thought, such as Baruch Spinoza, Hermann Cohen, Franz Rosenzweig, Martin Buber, Theodor Herzl, and Sigmund Freud. They also encompass his incisive analyses and original explorations of modern Judaism, which he viewed as caught in the grip of the theological-political crisis from German Jewry, anti-Semitism, and the

holocaust to zionism and the state of israel from the question of assimilation to the meaning and value of jewish history in addition strauss s two sustained interpretations of the hebrew bible are also reprinted these essays and lectures cumulatively point toward the postcritical reconstruction of judaism which strauss envisioned suggesting it rebuild along maimonidean lines thus the book lends credence to the view that strauss was able to uncover and probe the crisis at the heart of modern jewish thought and history perhaps with greater profundity than any other contemporary jewish thinker

this is a new presentation of the philosophy of the talmud the talmud is not a work of formal philosophy but much of what it says is relevant to philosophical enquiry including issues explored in contemporary debates in particular the talmud has original ideas about the relation between universal ethics and the ethics of a particular community this leads into a discussion on the relation between morality and ritual and also about the epistemological role of tradition the book explains the paradoxes of talmudic judaism as arising from a philosophy of revolution stemming from jewish origins as a band of escaped slaves determined not to reproduce the slave society of egypt from this arises a daring humanism and an emphasis on justice in this world rather than on other worldly spirituality a strong emphasis on education and the cultivation of rationality also stems from this governing the discussion is a theory of logic that differs significantly from greek logic talmudic logic is one of analogy not classification and is peculiarly suited to discussions of moral and legal human situations this book will be of interest to those in the fields of philosophy religion and the history of ideas whether students teachers and academics or the interested general reader
