master s thesis from the year 2015 in the subject business economics operations research grade 2 0
buckinghamshire new university language english abstract this thesis aims to research the
question does globalization impact the strategies of the german electrical installation companies and
how are the conditions for further growth this thesis conducted a mixed method approach to
achieve this research aim for the theoretical sensitivity this study uses pestel yip s
internationalisation driver s as well as porter s five forces framework followed by survey research
building upon these a survey was conducted within the german electrical industry to research on
the study s research question empirically with obtaining these empirical data this thesis gained
management and expert insights based on the research objectives the evaluation represents that
with this survey it was possible to identify discuss and analyze the strategic position the strategic
choices and the conditions for further growth of germany s electrical installation system companies
the first main recognition gained in this dissertation is that innovation projects such as the project
industry 4 0 from the german federal government is not considered in the strategies of german

electrical installation companies this is a disadvantage because other nations working intensively on this topic this is seen most critical for the future of the german electric industry the recommendation is to rework the current strategies and to include innovation projects such as the project industry 4 0 the next important outcome of the elaboration is that the globalisation affects the strategies of german electrical installation companies and the companies under research have no really internationalisation strategy although they are international active the survey shows that the essential inputs of the respondents lead to a preferred internationalisation strategy the simple export this result with respect to the respondents which have a strategy leads not only to advantages but also it leads to disadvantages the advantages are on the one hand cost aspects there are no operational facilities needed in the host country and by using the internet they are able to gain access into the international market but on the other hand this strategy does not allow the firm to benefit from the location advantages of the host nation and limits the opportunities to gain knowledge of the local market and respectively of the customers

about the book self esteem is a person s perception of their worth and value it also has to deal with people s sensations due to their sense of worthiness or unworthiness people s choices and decisions are significantly influenced by their self esteem in other words self esteem motivates people by making it more or less probable that they will take care of themselves and reach their full potential people with high self esteem are also driven to care for themselves and work hard toward achieving their objectives and desires people with low self esteem do not think they are deserving of or capable of getting pleasurable outcomes as a result they choose to put off important tasks and are less persistent and challenging in the face of adversity they may have the same goals as persons with higher self esteem but are less driven to see them through to completion self esteem is a reasonably nebulous word it s difficult for someone who doesn t have it to imagine what it s like to have it this book is written to help you commit to your self love with care and good intentions it should motivate you to make sound judgments that concern only your love care and the extent to which you are proud of yourself this book will challenge you to make intelligent judgments about yourself that increase rather than decrease your worth
