step 1 choose a domain name first things first every website needs a name without a name also known as a domain name your website simply cannot function think of it as a street address for a house where the address is the domain name and the house is your website when choosing a domain name there are several things to consider first choose a name that is easy to remember and spell second choose a name that is relevant to your business or brand third choose a name that is unique and not already taken by someone else fourth choose a name that is short and snappy fifth choose a name that is easy to pronounce and spell sixth choose a name that is easy to type and remember seventh choose a name that is easy to search for eighth choose a name that is easy to remember ninth choose a name that is easy to spell tenth choose a name that is easy to pronounce and spell

here s a quick step by step of how to do it in the wix editor open page manager click the pages menu icon in the left side panel to access the page manager add page click the blue add page button to create a new page and click on whatever template suits your needs

04 spread the word 05 continue to update your website 01 choose your website template if you re not sure how you want your site to look we recommend spending some time brainstorming before you get started browse some of the websites of other companies you admire to see how they get their messages across

from choosing the right website color scheme to crafting the right layout for your site you have to take into account many aspects of professional website design if you already know how to build a website from scratch and have some previous experience you can build your site starting from a blank website template deciding on the right dimensions for your design to begin choose your design type from the canva homepage these are set to the optimal dimensions for each graphic whether it s a social media post flyer photo book or more or you can use custom dimensions by searching for custom size you can choose from pixels

first step basic html page html is the standard markup language for creating websites and css is the language that describes the style of an html document we will combine html and css to create a basic web page note if you don t know html and css we suggest that you start by reading our html tutorial

02 choose your website builder now that you ve identified your goal your next step is to choose the right website builder to accomplish it a website builder also known as a cms is a platform on which you can design personalize and publish a website without any knowledge of coding

you want to create a website do you you re in the right place armed with this step by step guide you ll have a clear roadmap to follow for creating your own site you don t have to be a
