the working title of the book was the detection of analytes by the resin spot tests method firstly we decided to sort out all published qualitative methods systematically against analytes we were not discouraged by the obstacles such as the study of a great number of papers published in japanese the difficulty in locating especially older publications or the time required still having in mind not to burden unnecessarily the volume of the book we dismissed the idea of systematically listing all the procedures in detail nevertheless a relatively large number of them found a place in the book and perhaps this will contribute to the stirring of spontaneous interest in this technique in the ranks of applied chemists and others who a priori shun the technique

~~intonational structure like tonal association and alignment the~~  
characterization of leading and trailing tones and pitch accents  
structure it is argued that the hl accents of ep are real bitonal  
events whose features favour a hierarchical structured analysis of  
pitch accent structure with regard to focus it is shown that in ep  
focus is phonologically expressed by means of stress and accents  
effects and crucially not by means of phrasing effects and  
crucially not by means of phrasing effects of particular  
importance is the selection of a special pitch accent to convey  
early or late focus and the implications it has or the standard  
positional account of prominence and the stress reversal analysis  
of prominence patterns throughout the work the ep findings as  
well as the proposals set forth are discussed from a cross  
linguistic perspective with special reference to languages like  
english dutch german different varieties of italian and bengali  
also relevant to a general understanding of the prosodic reflexes  
of focus are languages like hungarian korean basque and wolof
