Web Services, Service–Oriented Architectures, and Cloud Computing

2012-12-31

services service oriented architectures and cloud computing is a jargon free highly illustrated explanation of how to leverage the rapidly multiplying services available on the internet the future of business will depend on software agents mobile devices public and private clouds big data and other highly connected technology it professionals will need to evaluate and combine online services into service oriented architectures soa often depending on services and cloud computing this can mean a fundamental shift away from custom software and towards a more nimble use of semantic vocabularies middle tier systems adapters and other standardizing aspects this book is a guide for the savvy manager who wants to capitalize on this technological revolution it begins with a high level example of how an average person might interact with a service oriented architecture and progresses to more detail discussing technical forces driving adoption and how to manage technology culture and personnel issues that can arise during adoption an extensive reference section provides quick access to commonly used terms and concepts broad non technical explanation of a technical topic for managers at all levels only web services book to cover data management and software engineering perspectives excellent resource for all members of it teams provides a set of leadership principles and suggested applications for using this technology

Web Services and Service-oriented Architectures

2003

interesting timely and above all useful savvy guides give it managers the information they need to effectively manage their technologists as well as conscientiously inform business decision makers in the midst of technological revolution

DRIS catalog of support services

1980

after the ips2 conferences in cranfield and linköping in 2009 and 2010 the 3rd cirp international conference on industrial product service systems ips2 2011 takes place in braunschweig germany ips2 itself is defined as an integrated industrial product and service offering that delivers value in use the customers expect comprehensive solutions which are adapted to their individual needs ips2 offers the possibility to stand out from competition and for long term customer loyalty particularly in times of economic crisis it becomes apparent which producing companies understand to satisfy the needs and requirements of their customers especially in this relatively new domain ips2 it will be important to keep track of the whole context and to seek cooperation with other research fields and disciplines the 3rd cirp international conference on industrial product service systems ips2 2011 serves as a platform for such collaborations and the discussion of new scientific ideas

U.S. Government Research & Development Reports

1966

many smart phone users reap the benefits of location based services while tracking users positions using their smart phone is an issue of concern for some others who use foursquare or rely on their android gps view location based services as a necessity ubiquitous positioning and mobile location based services in smart phones explores new

research in smart phones with an emphasis on positioning solutions in smart phones smart phone based navigation applications mobile geographical information systems and related standards

Functional Thinking for Value Creation

2011-03-18

this book provides the latest research and best practices in the field of mobile computing offering theoretical and pragmatic viewpoints on mobile computing provided by publisher

Statement of Secretary of Defense ... Before the House Armed Services

Committee on the ... Defense Budget and ... Program

1977

this book constitutes the thoroughly refereed post conference proceedings of the third international icst conference on personal satellite services psats 2011 held in malaga spain in february 2011 the 33 revised full papers presented were carefully reviewed and selected and cover a wide range of topics such as multimedia ip next generation satellite networks bandwidth allocation aeronautic communications for air traffic management dvb s2 hybrid networks delay tolerant networking channel estimation and interference management satellite antenna design and localization systems

Ubiquitous Positioning and Mobile Location-Based Services in Smart Phones

2012-06-30

life cycle engineering explores technologies for shifting industry from mass production and consumption paradigms to closed loop manufacturing paradigms in which required functions are provided with the minimum amount of production this subject is discussed from various aspects life cycle design design for environment reduce reuse recycle life cycle assessment and sustainable business models this book collects papers from the 14th international cirp life cycle engineering conference the longest running annual meeting in the field

Hearings, Reports and Prints of the House Committee on Armed Services

1979

for any digital tv developer or manager the maze of standards and specifications related to mhp and ocap is daunting you have to patch together pieces from several standards to gather all the necessary knowledge you need to compete worldwide the standards themselves can be confusing and contain many inconsistencies and missing pieces interactive tv standards provides a guide for actually deploying these technologies for a broadcaster or product and application developer understanding what the apis do is essential for your job but understanding how the apis work and how they relate to each other at a deeper level helps you do it better faster and easier learn how to spot when something that looks like a good solution to a problem really isn't understand how the many standards that make up mhp fit together and implement them effectively and quickly two dvb insiders teach you which elements of the standards that are needed for digital tv highlight those elements that are not needed and explain the special requirements that mhp places on implementations of these standards once you've mastered the basics you will learn

how to develop products for us european and asian markets saving time and money by detailing how a team can develop products for both the ocap and mhp markets interactive tv standards teaches you how to leverage your experience with one of these standards into the skills and knowledge needed to work with the critical related standards does the team developing a receiver have all the knowledge they need to succeed or have they missed important information in an apparently unrelated standard does an application developer really know how to write a reliable piece of software that runs on any mhp or ocap receiver does the broadcaster understand the business and technical issues well enough to deploy mhp successfully or will their project fail increase your chances of success the first time with interactive tv standards

Mobile Computing Techniques in Emerging Markets: Systems, Applications and Services

2012-01-31

this directory offers you all the necessary information on nearly 5 200 japanese affiliated companies a cd rom of the directory is also included

Personal Satellite Services

2011-10-19

the indian listener fortnightly programme journal of air in english published by the indian state broadcasting service bombay started on 22 december 1935 and was the successor to the indian radio times in english which was published beginning in july 16 of 1927 from 22 august 1937 onwards it was published by all india radio new delhi in 1950 it was turned into a weekly journal later the indian listener became akashvani in january 5 1958 it was made a fortnightly again on july 1 1983 it used to serve the listener as a bradshaw of broadcasting and give listener the useful information in an interesting manner about programmes who writes them take part in them and produce them along with photographs of performing artists it also contains the information of major changes in the policy and service of the organisation name of the journal the indian listener language of the journal english date month year of publication 07 01 1944 periodicity of the journal fortnightly number of pages 88 volume number vol ix no 2 broadcast programme schedule published page nos 12 21 84 article 1 today on the burma front the forgotten army 2 give the scientific your mite 3 our prisoners of war author 1 stuart emeny 2 prof a v hill 3 rao bahadur t s narayana iyer keywords 1 kingston bypass burma front chinese troops 2 united nations europe s failure human betterment 3 hague conference prisoners of war conflict of ideas document id inl 1943 44 d j vol 1 02

Advances in Life Cycle Engineering for Sustainable Manufacturing Businesses

2007-07-26

this book constitutes the refereed proceedings of the 3 rd international icst conference on it revolutions held in cordoba spain in march 2011 the 20 revised full papers presented were carefully reviewed and selected from numerous submissions they are grouped in topical sections on egreen energy smart buildings health and ambient assisted living smart environments and user experience grid and cloud computing elearning

Interactive TV Standards

2012-08-06

this book provides an introduction to the complex field of ubiquitous computing ubiquitous computing also commonly referred to as pervasive computing describes the ways in which current technological models based upon three base designs smart mobile wireless service devices smart environments of embedded system devices and smart interaction between devices relate to and support a computing vision for a greater range of computer devices used in a greater range of human ict and physical environments and activities the author details the rich potential of ubiquitous computing the challenges involved in making it a reality and the prerequisite technological infrastructure additionally the book discusses the application and convergence of several current major and future computing trends key features provides an introduction to the complex field of ubiquitous computing describes how current technology models based upon six different technology form factors which have varying degrees of mobility wireless connectivity and service volatility tabs pads boards dust skins and clay enable the vision of ubiquitous computing describes and explores how the three core designs smart devices environments and interaction based upon current technology models can be applied to and can evolve to support a vision of ubiquitous computing and computing for the future covers the principles of the following current technology models including mobile wireless networks service oriented computing human computer interaction artificial intelligence context awareness autonomous systems micro electromechanical systems sensors embedded controllers and robots covers a range of interactions between two or more ubicom devices between devices and people hci between devices and the physical world includes an accompanying website with powerpoint slides problems and solutions exercises bibliography and further reading graduate students in computer science electrical engineering and telecommunications courses will find this a fascinating and useful introduction to the subject it will also be of interest to ict professionals software and network developers and others interested in future trends and models of computing and interaction over the next decades

Directory of Japanese Affiliated Companies

2002-02

communications standards deals with the standardization of computer communication networks this book examines the types of local area networks lans that have been developed and looks at some of the relevant protocols in more detail the work of project 802 is briefly discussed along with a protocol which has developed from one of the lan standards and is now a de facto standard in one particular area namely the manufacturing automation protocol map factors that affect the usage of networks such as network management and security are also considered this book is divided into three sections and begins with an overview of various aspects of communications standards paying particular attention to the iso open systems interconnection osi network layer conformance testing of protocols and the use of computers in the manufacturing industry are considered the following chapters focus on the osi data link layer physical layer and session layer management issues in osi the iso file transfer access and management ftam protocol and the different environments in which osi and ibm s systems network architecture sna are defined message handling protocols the ccitt recommendation x 25 and high level protocols on ethernet are also described this monograph will be of interest to professionals in the field of computer science

THE INDIAN LISTENER

1944-01-07

providing unmatched access to the av industry and such developing technologies as multimedia virtual reality digital audio presentation software and interactive video this multi indexed resource makes it easy to find the names and numbers you need for example you ll discover an index of more than 1 250 av products and services a products services and companies index that identifies all firms geographically under separate audio audiovisual computer systems film video sections a company directory organized alphabetically that provides complete contact information for every organization listed a personnel directory that provides information on key personnel for each company listed

Educational and Industrial Television

1982-07

the nab engineering handbook is the definitive resource for broadcast engineers it provides in depth information about each aspect of the broadcast chain from audio and video contribution through an entire broadcast facility all the way to the antenna new topics include ultra high definition television internet radio interfacing and streaming atsc 3 0 digital audio compression techniques digital television audio loudness management and video format and standards conversion important updates have been made to incumbent topics such as am shortwave fm and television transmitting systems studio lighting cameras and principles of acoustics the big picture comprehensive nature of the nab engineering handbook will appeal to all broadcast engineers everyone from broadcast chief engineers who need expanded knowledge of all the specialized areas they encounter in the field to technologists in specialized fields like it and rf who are interested in learning about unfamiliar topics chapters are written to be accessible and easy to understand by all levels of engineers and technicians a wide range of related topics that engineers and technical managers need to understand are covered including broadcast documentation fcc practices technical standards security safety disaster planning facility planning project management and engineering management

Summary Technical Report of NDRC

1946

this book was developed in response to a request from bpl employees along with myself 121 bpl employees ex employees contributed to the publication it is the first time in the history of the indian electronic industry that a book including poignant stories written by its personnel has been published
