competition and cooperation between japan europe and usa is the key issue of this book both at government and business levels both short term and long term competitive cooperation between western and japanese firms and institutions can be fruitful cooperation however provides no easy solutions to problems which western economies have been unable to solve on their own governments as well as companies are often unprepared for cooperation with japan within the framework of larger scale projects on the other hand japan itself still lacks the leadership capacities to match its present economic and technological dominance thus the japanese strategy for a number two role in cooperation with the usa and the ec is described the discussion focuses on the implications of us japanese relations for europe it further highlights future relations between the us and japan in the field of technology and also deals with the ec japan context

100 of the Fastest Cars from the 1990s 1992-06-15

today a company s capability to conceive and design quality prototypes and bring a variety of superior products to market quicker than its competitors is increasingly the focal point of competition contend leading product development experts steven wheelwright and kim clark drawing on six years of in depth systematic

worldwide research they present proven principles for developing the critical capabilities for speed efficiency and quality that have worked again and again in scores of successful japanese american and european fast cycle firms the authors argue that to survive let alone succeed today s companies must construct a new platform with new methodologies on which they can compete using their model for development strategies wheelwright and clark show that firms can create a solid architecture for the integration of marketing manufacturing and design functions for problem solving and fast action particularly during the critical design build test cycles of prototype creation they demonstrate further how successful firms such as honda in automobiles compaq in personal computers applied materials in semi conductors sony in audio equipment the limited in apparel and hill rom in hospital beds have employed recent methodologies to bring new products to market at break neck speed such innovations include design for manufacturability quality function deployment computer aided design and computer aided engineering finally wheelwright and clark emphasize the importance of learning in the organization companies that consistently design it right the first time and follow a path of continuous improvement in product and process development have a formidable edge in the crucial race to market
