power and resistance debunks the dominant neoliberal hyper individualist approach to society's problems that sees poverty as a result of laziness environmental crises as a result of market demands for products that pollute and indigenous peoples struggles as a result of not assimilating we argue that it is social inequality and oppression that are the underlying causes of social problems in a society like ours powerful groups make choices that benefit them and force those choices onto others creating life problems for others and society as a whole the powerful also have influence over what is and is not called a social problem solving social problems requires changing the structures of inequality and oppression for example industrial corporate agriculture has created huge profits for a few gigantic food corporations but left much of the world hungry but farmers and their allies are pushing back through agroecology an agriculture based on local small scale ecologically sustainable farming that brings eaters and growers closer to one another the seventh edition of power and resistance includes new chapters on anti black racism in schools indigenous people and mental health food security and sovereignty and work in the gig economy

mainstream textbooks present economics as an objective science free from value judgements this book demonstrates this to be a myth one which serves to make such textbooks not only off puttingly bland but also dangerously misleading in their justification of the status quo and neglect of alternatives in this much needed

companion volume to the popular microeconomics anti textbook tony myatt reveals how the blind spots and methodological problems present in microeconomics continue to exert their influence in mainstream macroeconomics from a flawed conception of the labour market to a pollyana view of the financial sector macroeconomic principles as they are set out in conventional undergraduate textbooks consistently fail to set out a realistic useful or equitable framework for understanding the world by summarising and then critically evaluating the major topics found in a typical macroeconomics textbook the anti textbook lays bare their sins of omission and commission showing where hidden value judgements are made and when contrary evidence and alternative theories are ignored the macroeconomics anti textbook is the student s essential guide to decoding mainstream macroeconomic textbooks and demonstrating how real world economics are much more interesting than most economists are willing to let on

why red teaming the premise of the program at the university of foreign military and cultural studies ufmcs is that people and organizations court failure in predictable ways that they do so by degrees almost imperceptibly and that they do so according to their mindsets biases and experience which are formed in large part by their own culture and context the sources of these failures are simple observable and lamentably often repeated they are also preventable and that is the point of red teaming our methods and education involve more than socratic discussion and brainstorming we believe that good decision processes are essential to good outcomes to that end our curriculum is rich in divergent processes red teaming tools and liberating structures all aimed at decision support we educate people to develop a disposition of curiosity and help them become aware of biases and behavior that prevent them from real positive change in the ways they seek solutions and engage others we borrow techniques methods frameworks concepts and best practices from several sources and disciplines to create an education and practical applications that we find to be the best safeguard against individual and organizational tendencies toward biases errors in cognition and groupthink red teaming is diagnostic preventative and corrective yet it is neither predictive or a solution our goal is to be better prepared and less surprised in dealing with complexity what is red teaming red teaming is a function that provides commanders an independent capability to fully explore alternatives in plans operations concepts organizations and capabilities in the context of the operational environment oe and from the perspectives of partners adversaries and others a red team performs three general types of tasks support to operations planning and decision support critical review and analysis of already existing plans intelligence support threat emulation ufmcs provides education for the first two tasks tradoc s intelligence school and center provides education on the third in order for a red team to effectively contribute to decision making all of the following elements are required the ability to think critically about the problem while this may seem obvious the reality is that critical thinking is a

skill set that requires training education and tools the army assimilates people from different backgrounds across the nation one of the drawbacks of that assimilation is our military tendency to reflect the same biases and perspectives we pride ourselves in common values which while ingrained in the army culture are not universal outside of that culture thinking critically and challenging the group is an unnatural act for military staffs doing so effectively requires tools and methods that enable leaders to see different perspectives red teams require top cover to be allowed to challenge the conventional wisdom and the organization's leaders no matter the quality of the red team or the methods they employ dictatorial or toxic leaders are incompatible with successful red teaming red teaming is not easy and not everyone can do it red teamers must be effective written and oral communicators they must have credibility in the area in which they are providing red teaming insights they must be able to constructively challenge the plan this means focusing on what is truly important able to explain why it is being challenged and offering some alternative ways to think about the problem
