WTF?: What's the Future and Why It's Up to Us 2017-10-19 children's rights the phrase has been a legal battle cry for twenty five years but as this provocative book by a nationally renowned expert on children's legal standing argues it is neither possible nor desirable to isolate children from the interests of their parents or those of

society as a whole from foster care to adoption to visitation rights and beyond martin guggenheim offers a trenchant analysis of the most significant debates in the children's rights movement particularly those that treat children's interests as antagonistic to those of their parents guggenheim argues that children's rights can serve as a screen for the interests of adults who may have more to gain than the children for whom they claim to speak more important this book suggests that children's interests are not the only ones or the primary ones to which adults should attend and that a best interests of the child standard often fails as a meaningful test for determining how best to decide disputes about children

Eating Dangerously 2014-04-02 exploring the links between gm foods glyphosate and gut health with chronic disorders among american children reaching epidemic levels hundreds of thousands of parents are desperately seeking solutions to their children s declining health often with little medical guidance from the experts what s making our children

sick convincingly explains how agrochemical industrial production and genetic modification of foods is a culprit in this epidemic is it the only culprit no most chronic health disorders have multiple causes and require careful disentanglement and complex treatments but what if toxicants in our foods are a major culprit one that if corrected could lead to tangible results and increased health using patient accounts of their clinical experiences and new medical insights about pathogenesis of chronic pediatric disorders taking us into gut dysfunction and the microbiome as well as the politics of food science this book connects the dots to explain our kids ailing health what's making our children sick explores the frightening links between our efforts to create higher yield cost efficient foods and an explosion of childhood morbidity but it also offers hope and a path to effecting change the predicament we now face is simple agroindustrial innovation in a previous era hoped to prevent the ecosystem disaster of ddt predicted in rachel carson's seminal book in 1962 silent spring however this industrial agriculture movement has created a worse disaster a toxic environment and consequently a toxic food supply pesticide use is at an all time high despite the fact that biotechnologies aimed to reduce the need for them in the first place today these chemicals find their way into our livestock and food crop industries and ultimately onto our plates many of these pesticides are the modern day equivalent of ddt however scant research exists on the chemical soup of poisons that our children consume on a daily basis as our food supply environment reels under the pressures of industrialization via agrochemicals our kids have become the walking evidence of this failed experiment what's making our children sick exposes our current predicament and offers insight on the medical responses that are available both to heal our kids and to reverse the compromised health of our food supply

Ladies of the Shire 2009-01-05 what is the meaning of life it is a question that has intrigued the great philosophers and has been hilariously lampooned by monty python indeed the whole idea strikes many of us as vaguely pompous a little absurd is there one profound and mysterious meaning to life a single ultimate purpose behind human existence in what's it all about julian baggini says no there is no single meaning instead baggini argues meaning can be found in a variety of ways in this life he succinctly breaks down six answers people commonly suggest when considering what life is all about helping others serving humanity being happy becoming successful enjoying each day as if it were your last and freeing your mind by reducing the vague mysterious question of meaning to a series of more specific if thoroughly unmysterious questions about what gives life purpose and value he shows that the quest for meaning can be personal empowering and uplifting if the meaning of life is not a mystery if leading meaningful lives is within the power of us all then we can look around us and see the many ways in which life can have purpose we can see the value of happiness while accepting it is not everything we can see the value of success without interpreting that too narrowly we can see the value of seizing the day as well as helping others lead meaningful lives we can recognize the value of love as perhaps the most powerful motivator of all illustrating his argument with the thoughts of many of the great philosophers and examples drawn from everyday life baggini convincingly shows that the search for meaning is personal and within the power of each of us to find
