Lost in Dialogue 2017 to be human means to be in dialogue dialogue is a unitary concept used by the author to address in a

coherent way three essential issues for clinical practice what is a human being what is mental pathology and what is care in this book stanghellini argues that to be human means to be in dialogue with alterity that mental pathology is the outcome of a crisis of one's dialogue with alterity and that care is a method wherein dialogues take place whose aim is to re enact interrupted dialogue with alterity within oneself and with the external world this essay is an attempt to re establish such a fragile dialogue of the soul with herself and with others such an attempt is based on two pillars a dialectic person centered understanding of mental disorders and values based practice the dialectic understanding of mental disorders acknowledges the vulnerability constitutive of human personhood it assumes that the person is engaged in trying to cope solve and make sense of new disturbing puzzling experiences stemming from her encounter with alterity values based practice assumes that the forms of human life are inherently plural value pluralism and recognition are the basis for care this statement reflects the ideal of modus vivendi that aims to find terms in which different forms of life can coexist and learn how to live with irreconcilable value conflicts rather than striving for consensus or agreement care is a method wherein dialogues take place whose aim is to re enact interrupted dialogue with alterity within oneself and with the external world it includes practices that belong both to logic e g the method for unfolding the other's form of life and to rescue its fundamental structure and empathy e g the readiness to offer oneself as a dialoguing person and the capacity to resonate with the other's experience and attune regulate the emotional field
