we are caught up in the cycle of so called holy wars in the jihad of jesus dave andrews argues that while this inter communal conflict is endemic it is not inevitable depending on our understanding our religions can be either a source of escalating conflict or a resource for overcoming inter communal conflict and for our religions to be a resource for overcoming conflict we need to understand the heart of all true religion as open hearted compassionate spirituality in the light of an open hearted compassionate spirituality we can reclaim the word jihad from extremists who have mis appropriated it as a call to holy war and reframe it in truly qur anic terms as a sacred nonviolent struggle for justice and we can reconsider jesus as he is in the gospels not as a poster boy for christians fighting crusades against muslims but as a strong but gentle messianic figure who can bring christians and muslims together as this book shows many christians and muslims have found isa jesus and the bismillah celebrating the mercy grace and compassion of god as common ground upon which they can stand and work for the common good the jihad of jesus is a handbook for reconciliation and action a do it yourself guide for all christians and muslims who want to move beyond the clash of civilizations join the jihad of jesus and struggle for justice and peace nonviolently side by side

is india ready for superpower status or too far behind china to ever catch up in his career as one of india s leading journalists and entrepreneurs raghav bahl has often faced this question and many others from bewildered visitors why are indian regulations so weak and confusing why is your foreign investment policy so restrictive how come your hotels are world class but the roads leading to them are so potholed why don t you lower your voice when you make fun of your politicians why do you control the price of oil and cable tv clearly there s a huge difference in how india and its arch rival china work on the ground china is spectacularly effective in building infrastructure and is now reinvesting almost half its gdp meanwhile india is still a promising economy more than half its gdp is consumed by its billion plus people yet india has some unique advantages half its population is under twenty five giving it a strong demographic edge 350 million indians understand english making it the largest english speaking country in the world and it s the world s largest democracy in the race to superpower status who is more likely to win china s hare or india s tortoise bahl argues that the winner might not be determined by who is investing more and growing faster today but by something more intangible who has superior innovative skills and more entrepreneurial savvy he notes that china and india were both quick to recover from the financial crisis but china s rebound was accompanied by huge debt and deflation with weak demand india s turnaround was sturdier with lower debt and modest inflation so india s gdp grew twice as fast as china s for a few quarters the first time that had happened in nearly three decades and in contrast to china s yuan which is pummeled for being artificially undervalued india s rupee largely floats against world currencies in the end it might come down to one deciding factor can india fix its governance before china repairs its politics with insights into the two countries histories politics economies and cultures this is a well written fully documented comprehensive account of the race to become the next global superpower for anyone looking to understand china india and the future of the world economy this is the book to read
