doing educational administration is the final part in a three volume series by Evers and Lakomski presenting their perspective on educational administration. The first volume, *Knowing Educational Administration*, established the importance of epistemological issues in the international field of educational administration and suggested a new post-positivist approach to research. The theoretical approach presented in the first volume was further examined in *Exploring Educational Administration*, where the authors' theories were considered in an applied context. In this, the third and final volume, the authors conclude their presentation of their post-positivist theory by demonstrating how their account of knowledge and cognition shapes the content and structure of administrative practice. Built around a set of basic issues in the practice of educational administration, where the role of conditions is of primary importance, Evers and Lakomski produce a comprehensive and persuasive applied theory of administrative practice.
