Person-Centred Care Made Simple 2014 this edited book focuses on the application of patient care within the three specialisms diagnostic radiography including fluoroscopy computed tomography breast imaging ultrasound and magnetic resonance imaging radiotherapy and oncology and nuclear medicine and molecular imaging person centred care in radiology international perspectives on high quality care draws from recent publications and clinical expertise supported with this trend of technological advances and how they are supposed to enhance patient care the chapters seek to uncover the role and behavior of radiographers this will be supported with chapters on a key aspect which will impact both radiographers and patients vis à vis advancing technology these chapters include topics such as artificial intelligence image acquisition coincided with topics surrounding ethics the edited volume includes contributions from the united states canada the uk and australasia to bring together for the first time those at the forefront of this growing field in medical imaging this book may be used to influence policymaking decisions and thus influence how healthcare delivery is offered in an ever evolving imaging environment in short this text bridges the gap between what is advocated in the literature with experience as observed in practice

the targeted audience for this book is multifaceted it will primarily be a book that facilitates undergraduate radiography students worldwide it will offer a useful tool for academics delivering undergraduate pre registration radiography programs this book will act as a primer for undergraduate students but importantly signpost to other key texts within the field further academics will find this text useful as it aims to enrich scholarly learning teaching and assessment to healthcare programs nationally and internationally

Person-Centred Care in Radiology 2024-04-09 through the use of varied case studies this book explains and demonstrates how nurses can transform the ideals of person centred care into reality for patients throughout their healthcare journey in a variety of settings

Delivering Person-Centred Care in Nursing 2022-01-12 person centred care in radiography a helpful guide to patient and person centered care in radiography with a particular focus on interpersonal and communication skills person centred care in radiography skills for providing effective patient care explores the complex interpersonal skills that are required of practitioners and medical imaging professionals which ensure high quality service is given to person centred care in radiography the textbook is also written by a team of

expert authors and grounded in the team's own research as well as their involvement with the heads of radiography group the association of radiography educators the collaborating centre for values based practice in health and social care and the college of radiographers the textbook contains a broad range of additional learning features including case studies student exercises annotated further readings and chapter summaries diagrams and illustrations are used throughout the book to provide visual representation of the concepts presented learning activities are also included throughout the book to encourage readers to self discover and reflect and then apply their learning to their own role person centred care in radiography includes detailed information on and discussion of values developing resilience defining compassion pain and suffering and professional behaviors and culture scenarios developed by service users based on real life practice to demonstrate the impact of the professional's behavior on the care received diversity of service users the role of carers conceptual frameworks interpersonal communication skills and communicating with patients beyond introductions values based practice compassionate practice theoretical models for patient centered care in radiography and reflections to help readers move forward targeted at all staff

working within diagnostic and therapeutic radiography clinical departments and educational institutions person centred care in radiography can be used in both radiography education by students and educators and by qualified staff who wish to reflect on their own patient care and develop their skills

Person-centred Care in Radiography 2023-07-19 many nurses start their career in healthcare because they are motivated by compassion for others they choose the nursing profession because they want to be of significance to people who are ill or otherwise troubled for most of them compassion remains their main reason for staying at work in nursing jobs every day despite low wages and a high workload care users such as patients in hospitals and people who need care at home or in a nursing home facility value nurses who see what is important for them and who show their compassion itâ s therefore remarkable that compassion is not always perceived as an explicit value in nursing practice and education questioning this an explanation might be that it is difficult to fit compassion into the hectic ways of daily practice also in most healthcare systems every professional is held accountable for the care and quality of care one delivers and in which evidence based practice is the golden standard how does compassion fit

into that paradigm isn't compassion a rather old fashioned and a soft phenomenon for nurses who are proud to be professionals this book formulates answers to those and other questions about compassion as a core value for nursing it shows that compassion is indispensable for good quality of nursing care and even a necessity for evidence based nursing practice the book is based on several research studies performed by the author

Compassion, the Core Value in Person-centred Care 2022-03-22 gain a solid foundation in nursing leadership and management skills using real world examples leading and managing in nursing 8th edition helps you learn to provide caring compassionate and professional nursing leadership topics range from core concepts to knowing yourself knowing the organization communication and conflict managing stress delegating staffing and scheduling and managing costs and budgets new to this edition are next generation nclex exam style case studies three new chapters and updated guidelines to evidence based practice written by a team of nursing educators and practitioners led by patricia s yoder wise and susan sportsman this book combines theory research and practical application to help you succeed in an ever changing healthcare environment unique the challenge opens each chapter with a

Leading and Managing in Nursing E-Book 2022-09-09 an evidence based analysis of the opportunities and challenges of moving towards more person centred health systems

Achieving Person-Centred Health Systems 2020-08-06 john milbank s theology has shaped much modern political thinking both within and without the church in before and beyond the big society joseph forde presents the first study devoted exclusively to john milbank s theology of welfare and how it has influenced policy in the church of england since 2008 by examining the favourable response the church gave to the big society project in 2010 12 forde shows that milbank s blue socialist fingerprint increasingly dominates however this theology has not evolved in a vacuum and forde expertly places it in its historical and theoretical context he offers a detailed critical

discussion of milbank s own critique of what has been the mainstream temple anglican theology of welfare in the church of england since the 1940s and a fresh contribution to the assessment of anglican social theology finally he demonstrates how milbank s ideas have been furthered by other influential anglicans it is this influence that will carry the greatest implications for the church of england s policy on welfare going forward making this study relevant to all who care about its contribution to the provision of welfare

Before and Beyond the 'Big Society' 2022-05-26 in this book the theory and practices of person centered care has been elaborated in detail

PERSON CENTRED CARE THEORY AND PRACTICES 2021-07-28 support workers are key deliverers of care in the uk often hugely valued by those people they provide care for their roles and responsibilities are increasing in the midst of ever changing health and social care systems a handbook for support workers in health and social care recognises the contribution of support workers and provides an introduction to the core knowledge legislation and models of practice required to work across health and social care settings covering core person centred skills that a support worker needs to develop this textbook looks at knowing and managing yourself before moving on to

understanding your role in the organisation and teamwork it outlines the relevant legislation and policies from the care act 2014 to confidentiality communication both written and in person is a central theme and key values such as compassion and dignity are explored in relation to this there is a thought provoking discussion of working with people covering topics including respecting choices thinking about risk and safeguarding the book ends by looking at what it means to be a competent practitioner and the importance of continual professional development the first textbook introducing the core theory and practice knowledge necessary to work as a support worker in health and social care it includes case studies tasks and exercises to help the reader apply their learning the authors share more than 20 years of experience in the design and delivery of support worker courses in higher education they deliver continuing professional development bespoke training and consultation to the health and social care workforce

with an overview of the content and concludes with key take home messages and further reading suggestions a set of self assessment exercises case studies and examples from clinical practice preparing for professional practice in health and social care is a useful reference for all allied health professionals

Preparing for Professional Practice in Health and Social Care

2022-03-29 bringing together leading international and interdisciplinary scholars this ground breaking volume examines the theory and practice of philosophical health in contemporary contexts of care broadly understood care for the self care for the other and care for the world but what do we mean by philosophical health whilst this book does not seek to provide a normative definition as it explores disparate perspectives and encourages pluralism in philosophical ways of life one may envision philosophical health as a state of creative coherence between a person s or a group s way of thinking and their way of acting such that the possibilities for a good life are increased and the needs for flourishing satisfied an idea central to philosophical health is the concept of possibility without a sense of self possibility and openness to the future health loses meaning and conversely pathologies are defined by various kinds

of impossibilities as such philosophical health reconsiders care as a process of cultivating or pruning the compossible in embodied psychological and social terms of allowing things to re generate or in some cases to vanish drawing on the history of philosophy phenomenology new materialism post colonialism but also a wide range of contemporary approaches to philosophical practice philosophical health sheds light on the understudied philosophical dimension of care and the healing dimension of philosophizing advocating philosophy as a lived practice it uncovers the increasing relevance of philosophical health to contemporary debates on well being well belonging counselling and development

Philosophical Health 2023-12-28 a unique guide to coping and thriving in the nhs today with practical practice focused and evidence based advice to support students and qualified nurses to build their resilience and manage stress and conflict as well as nurture their wellbeing

Coping and Thriving in Nursing 2018-06-11 through the detailed examination of a large corpus of healthcare interactions collected from a range of settings over a 25 year period pilnick illustrates the ways in which there are good organisational and interactional reasons

for what may look from a pcc perspective like bad healthcare practice
