Cycle World Magazine 1999-01 accident reconstruction utilizes principles of physics and empirical data to analyze the physical electronic video audio and testimonial evidence from a crash to determine how and why the crash occurred how the crash could have been avoided or to determine whose description of the crash is most accurate this process draws together aspects of mathematics physics engineering materials science human factors and psychology and combines analytical models with empirical test data different types of crashes produce different types of evidence and call for different analysis methods still the basic philosophical approach of the reconstructionist is the same from crash type to crash type as are the physical principles that are brought to bear on the analysis this book covers a basic approach to accident reconstruction including the underlying physical principles that are used then details how this approach and the principles are applied when reconstructing motorcycle crashes this second edition of motorcycle accident reconstruction presents a thorough systematic and scientific overview of the available methods for reconstructing motorcycle crashes this new edition contains additional theoretical models examples case studies and test data an updated bibliography incorporating the newest studies in the field expanded coverage of the braking capabilities of motorcyclists updated refined and expanded discussion of the decelerations of motorcycles sliding on the ground a thoroughly rewritten and expanded discussion of motorcycle impacts with passenger vehicles updated coefficients of restitution for collisions between motorcycles and cars a new and expanded discussion of using passenger car edr data in motorcycle accident reconstruction a new section covering recently published research on post collision frozen speedometer readings on motorcycles a new section on motorcycle interactions with potholes roadway deterioration and debris and expanded coverage of motorcycle falls this second edition of motorcycle accident reconstruction is a must have title for accident reconstructionists forensic engineers and all interested in understanding why and how motorcycle crashes occur

Motorcycle Accident Reconstruction 2022-01-07 kroeker is a death investigator in the largest county in the nation he has investigated nearly 4 000 deaths and brings to his writing this vast experience blame is a series of short stories that explores the role the individual played in their death blame attempts to educate the reader on personal choices they make daily which could bring their life to an untimely end or promote a long prosperous life *Who's to Blame* 2012-01-02 american motorcyclist magazine the official journal of the american motorcyclist associaton tells the stories of the people who make motorcycling the sport that it is s available monthly to ama members become a part of the largest most diverse and most enthusiastic group of riders in the country by visiting our website or calling 800 ama join

Cycle World 1999-07 Эта книга не справочник по огромному миру мотоциклов Не сборник советов по их обслуживанию тюнингу и ремонту Не туристический путеводитель по солнечным пляжам или суровой тайге Не философская теория объясняющая место и роль мотоциклистов во Вселенной Не автобиография не подборка кулинарных рецептов и не фотоальбом Это просто всего понемногу ведь наша жизнь и состоит из приятных воспоминаний из философии из прямых дорог и поворотов ночной прохлады и дневной жары из ароматов кофе и моторного масла Почему люди выбирают для себя мотоцикл как это увлечение затягивает как постепенно ты открываешь для себя мир путешествий на двух колесах Точка зрения автора немного приправленная байкерскими байками и пылью дорог
