in today's society it is generally the written word that holds the authority we are more likely to trust the words found in a history textbook over the version of history retold by a friend after all human memory is unreliable and how can you be sure your friend hasn't embellished the facts but before humans were writing down their knowledge they were telling it to each other in the form of stories the edge of memory celebrates the predecessor of written information the spoken word tales from our ancestors that have been passed down transmitting knowledge from one generation to the next among the most extensive and best analysed of these stories are from native Australian cultures these stories conveyed both practical information and recorded history describing a lost landscape often featuring tales of flooding and submergence these folk traditions are increasingly supported by hard science geologists are starting to corroborate the tales through study of climatic data sediments and land forms the evidence was there in the stories but until recently nobody was listening in this book Patrick Nunn unravels the importance of these tales exploring the science behind folk history from various places including northwest Europe and India and what it can tell us about environmental phenomena from coastal drowning to volcanic eruptions these stories of real events were passed across the generations and over thousands of years and they have broad implications for our understanding of how human societies have developed through the millennia and ultimately how we respond collectively to changes in climate our surroundings and the environment we live in

the problem of oral tradition is well known for without some theory of this medium no history of jesus would be possible this study examines mark 4 1 34 in the light of three distinctive models of orality rudolf bultmann s form critical method b gerhardsson s memory and manuscript theory and the recent contribution of w kelber the form critically separate units in the test allegory parables and aphorisms are examined on the basis of their attestation in various documents mark q thomas to determine whether independent versions of these sayings can be identified and what they tell us about the oral phase and jesus this analysis suggests that the criteria for authenticity of distinctiveness and multiple attestation need to be re examined in light of the folkloric understanding of orality

this book is an account of the history of the abathembu from the reign of ukumkani nxeko in c 1650 to the death of ukumkani dalindyebo in 1920 the importance of this cut off date lies in the fact that ukumkani dalindyebo s reign was characterised by relative stability compared to those of his predecessors his prestige however was demeaned by the department of native affairs secretary whose instruction was that ukumkani dalindyebo should not be addressed as a paramount chief as that title applied exclusively to the government thereby strengthening the government s position and elevating it to be above customary law abathembuland was and still is central to the history of the former transkei region and south africa not only does it form part of the former transkei region but it also constitutes south africa and so divisions conflicts developments and or underdevelopments in abathembuland inevitably affected not only the former transkei region but also the greater part of south africa in no small measure thus the history of abathembuland and the divisions thereof overlap with the history of the former transkei region and south africa

a masterful and eminently readable journey through the fascinating insights and revelations of biblical archeology publishers weekly starred review many of our religious beliefs are based on faith alone but archaeology gives us the opportunity to find evidence about what really happened in the distant past evidence that can have a dramatic impact on what and how we believe in digging through the bible archaeologist and rabbi richard freund takes readers through digs he has led in the holy land searching for evidence about key biblical characters and events digging through the bible presents overviews of the evidence surrounding figures such as moses kings david and solomon and mary the mother of jesus as well as new information that can help us more fully understand the life and times in which these people would have lived freund also presents new evidence about finding the grave of the teacher of righteousness mentioned in the dead sea scrolls and gives a compelling argument about how the exodus of the israelites may have taken place in three separate waves over time rather than in a single event as presented in the bible

there has been a varied range of studies on jesus though now it seems there is a pause and perhaps opening to new orientation with the aim not simply to cover old ground or repeat past mistakes this is a study of jesus and christian origins with a primary focus on the gospels there have been comprehensive and important contributions like n t wright s the new testament and the people of god at the same time more defined studies have appeared the purpose here is not to develop particular new testament themes as such rather in this volume the writers take up gospel related topics in the context of the early church in order to illuminate specific baselines for new testament interpretation and to discern directions toward a new paradigm there is much to do the need to take account of reception history and so of the external evidence for the new testament documents also eyewitness and oral tradition as embodied in the gospel accounts the genre of the gospels with reference to biography or history has its own importance the reception and authority of the gospels in the early church marks another baseline jesus in his jewish context and in relation to emerging christianity is also a critical baseline for interpretation

From the earliest Gospel Q to the Gospel of Mark focuses on the remarkable overlaps between Jesus's teachings in the lost Gospel Q and Mark. Dennis R. MacDonald argues synoptic intertextuality is best explained not as the redaction of sources but more flexibly as the imitation of literary models. Part one applies the criteria of mimesis criticism in a running commentary on Q to demonstrate that it polemically imitated Deuteronomy. Part two argues that Mark in turn tendentiously imitated Logoi. The conclusion proposes that Matthew and Luke in turn brilliantly and freely imitated both Logoi and Mark and by doing so created scores of duplicate sayings and episodes (doublets).

The Quechan are a Yuman people who have traditionally lived along the lower part of the Colorado River in California and Arizona. They are well known as warriors, artists, and traders and they also have a rich oral tradition. The stories in this volume were told by tribal elders in the 1970s and early 1980s. The eleven narratives in this volume take place at the beginning of time and introduce the reader to a variety of traditional characters including the infamous Coyote and also Kwayúu, the giant old lady Sanyuuxáv and her twin sons and the man who bothered ants. This book makes a long-awaited contribution to the oral literature and mythology of the American Southwest and its format and organization are of special interest. Narratives are presented in the original language and in the storytellers' own words. A prosodically motivated broken line format captures the rhetorical structure and local organization of the oral delivery and calls attention to stylistic devices such as repetition and syntactic parallelism. Facing page English translation provides a key to the original Quechan for the benefit of language learners. The stories are organized into story complexes that is clusters of narratives with overlapping topics, characters, and events told from diverse perspectives. In presenting not just stories but story complexes, this volume captures the art of storytelling and illuminates the complexity and interconnectedness of an important body of oral literature. Stories from Quechan oral literature provides invaluable reading for anyone interested in Native American cultural heritage and oral traditions. More generally, publisher's website.

Stories from Quechan Oral Literature 2014

In spite of long truces and temporary agreements, Christianity and the state had become two rival powers striving for the mastery of the world and until the close of the final contest under Diocletian there could be no real peace between them. The church was herself fully prepared for the struggle during the first century of her existence. She had perfected her organization and her leaders, the bishops, had obtained unquestioned authority from the conquest of heathenism by Christianity. A.D. 161 A.D. 313 with equal measures of reverence and erudition, this classic 1891 history of Christianity offers a succinct survey of the church from its pre-Christian foundations in Israel through its ascendancy to an absolute force for cultural and religious power during the Dark Ages. the problem of the way in which patristic exegetes viewed the new testament and indeed the whole bible has concerned scholars a good deal in recent years especially since it has been discovered that many of the fathers methods were analogous to our own the problem of historical criticism however does not seem to have occupied so much attention by concentrating on one problem that of the life of jesus i have sought to see how early christians up to and including origen faced it and what there is in their work which deserves retention or rejection from the preface
