this book is a fascinating scientific inquiry into the question of how humans came to the existence that we know today the goal for this book is to serve as a handbook of comparative mythology a large portion of text is dedicated to retelling condensed versions of the ancient myths of the world so that a beginning scholar may attain a worldly knowledge of cultural myths that they can compare independently in addition to this large body of mythological evidence a matrix method of comparable characters is presented such that a common thread of history emerges by comparing outlines of stories from around the world the basic storyline of history includes parts from all religions the history of the world as we currently understand it will dramatically change by three discoveries presented in this book first is evidence and mathematical proof that ancient earth was struck by a portion of halley s comet second is discovery of an ancient map of the world encrypted into the body of an ancient fresco third is discovery of a matrix method giving mathematical probability to characters often thought purely mythical this book promises to offer the greatest paradigm shift in thinking on human history since darwin and in doing so it presents a return to many of the greatest arts and literature stories the world has ever known in simple real life stories what the matrix method means is that the mythological characters of father heaven and mother earth show up in most cultural myths as the first set of parents to the world sea and sun and moon are of the second generation thunder and underworld are of the third generation matrix comparison leads to the conclusion that a universal pantheon of founders once existed where it gets really interesting is the point where recognizable historic figures relate to the same entities as mythical characters zeus is the same person as ramses 1 hera is the same person as nefertiti and sara and ishtar this book will be of interest to artists and scientists as well as historians religious scholars and storytellers

excerpt from an introduction to the science of comparative mythology and folklore my purpose in this volume is to give a general view of the vast mass of popular traditions belonging to the aryan nations of asia and europe and of other tribes so far as the conditions of the subject may render necessary its starting point is the principle that the popular traditions of no one aryan people can be really understood except in their relation to those of other tribes and nations of the same family and that the epical and dramatic literature of those races has been constructed from materials common to all branches of the aryan stock and furnished by popular sayings stories and tales many of which have never had the good fortune to be more than the talk of nurses and children the greek term mythology scarcely expresses indeed the fact that the traditions on which the epic lyric and dramatic poetry of the aryan nations has sprung up really constitute what in strict speech we may speak of as the whole learning of the people in early stages of thought and civilisation and sum up their thoughts on the origin and constitution of the outward world about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

excerpt from bible folk lore a study in comparative mythology the present volume is the result of some twelve years of serious and special study it is an attempt to apply the principle of evolution to the history of hebrew and christian belief and to lay before the public for its consideration the results which appear to the author to spring from the recent researches of orientalisists whether students of semitic or of aryan antiquities englishmen are as yet little aware as a rule of the vast stores of accurate and detailed information bearing on the comparative study of the bible which have through the patient labour of many scholars been slowly accumulated during the last twenty years they know no doubt that cuneiform inscriptions and papyri have been read and that the sacred books of india and of persia have been translated but they do not know how fundamentally this increased

knowledge affects the very basis of an examination of the bible literature as a whole the author's main contention is then that the biblical literature can no longer be considered to stand alone as a unique production of genius or inspiration but that its real origin and meaning can only be understood by the application of the comparative method which has as yet been only very imperfectly utilised in connection with the bible traditions the mythical hypothesis is not it is true a new one about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

this highly original study in comparative mythology interprets the greek myths in the light of the mythologies of other indo european cultures indian celtic scandinavian roman greek iranian and ossetian julian baldick uses a modified version of the schema proposed by the french theorist dumezil little known and often misunderstood in the anglo saxon world to consider the profound connections between such works as the iliad the odyssey the great indian epics the ramayana and the mahabharata the iranian book of kings and the scandinavian ynglingasaga the book includes a long critical exposition of the discipline of comparative mythology from its eighteenth century origins to the revival of the discipline by dumezil and his followers from 1938 to the present also reassessing the profound critique of dumezil which linked him with far right ideology baldick s book is an important new contribution to work on comparative mythology

to the student of myth this book attempts to provide a concise overview of the theoretical approaches to studying mythology both in theory and in everyday life whether one is interested in a particular myth or mythic tradition or understanding comparative mythology more broadly or even the subject and overview of mythology as a whole this text attempts to present a clear and understandable introduction to some of the best tried and true approaches as well as to address some of the perennial problems and points of confusion to embark on the study of myth is to join a noisy chorus of scholars both present and past in attempting to divine the meaning of some of the most important intriguing and at times puzzling narratives that humankind has ever crafted we hope this text will help provide you with the theoretical background and tools to allow for a rich full study of mythology in all its myriad forms to the teacher of myth myth has been the source of a great deal

of theoretical disagreement and confusion as well we have tried to address some of the controversies by appealing to a close and careful consideration of the data which at times helps keep lofty theorizing firmly anchored in the real world additionally we have tried to present a historical background to the study of myth which should also help illuminate the close relationships between a society and that society's views of myth mythology does not occur without people it is only with a strong grounding in the study of humankind that we can hope to make progress in our understanding where doubt within the scholarly community has arisen we have tried to pay attention to both sides of the debates the resulting text is intended to be a detailed yet engaging introduction to the study of world mythology and a scholarly counterweight to popular unscientific views our experience in teaching myth is that the most vexing issues stem from the several strained if not contradictory connotations that the term myth carries is myth archaic or is it part of all societies and thus modern as well is it part of religion and or science or does it contrast with these most vexingly does myth designate falsehood or the highest forms of truth those that form the core guiding principles of particular societies engagements of the cosmos and life within it there is also the double signification of the term mythology which points to both an academic tradition and the object studied by that tradition our view is that while such antinomies are unlikely to be resolved in the foreseeable future much can be gained by locating and identifying them and by attempting to understand how and why they have emerged we hope that this approach not only lends clarity to the topic of myth but also serves to energize the study to which we now turn
