## **theodolite instructions harvard university Dec 22 2023**

a theodolite is a telescope mounted to very sensitive horizontal and vertical protractors it is capable of measuring angles and when used in conjunction with graduated reference objects distances with a high degree of accuracy theodolites are primarily used by surveyors to map out terrain

## **what is edm in survey electronic distance measurement Nov 21 2023**

edm is commonly carried out with digital instruments called theodolites edm instruments are highly reliable and convenient pieces of surveying equipment

and can be used to measure distances of up to 100 kilometers
