Military Construction, Veterans Affairs, and Related Agencies Appropriations Bill, 2015 2017-03-25 this edited book examines the experience of small states in europe during the 2015 2016 migration crisis the contributions highlight the challenges small states and the european union faced in addressing the massive irregular flow of migrants and refugees into europe and the schengen area small states adopted a number of coping strategies and proved relatively effective in navigating the storm they faced externally they pursued strategies of shelter seeking hiding hedging and norm entrepreneurship while domestically they tended to securitize migration and to pursue scapegoating by blaming the eu and other states for the nature and magnitude of the crisis during this crisis management their small administrations proved resilient and flexible in their responses despite suffering from limited resources and being subject to the shifting preferences of stronger actors this book shows that independent of whether we view the migration crisis as a crisis for the european union or europe as a whole or how we interpret the intensity and severity of the crisis this was a crisis for small states in europe the crisis disrupted the liberal and institutionalized order upon which small states in the region had increasingly based their policies and influence for more than 60 years

*Appendix, Budget of the United States Government, Fy 2015* 2021-04-26 this comprehensive textbook by the editor of law and the internet seeks to provide students practitioners and businesses with an up to date and accessible account of the key issues in internet law and policy from a european and uk perspective the internet has advanced in the last 20 years from an esoteric interest to a vital and unavoidable part of modern work rest and play as such an account of how the internet and its users are regulated is vital for everyone concerned with the modern information society this book also addresses the fact that internet regulation is not just a matter of law but increasingly intermixed with technology economics and politics policy developments are closely analysed as an intrinsic part of modern governance law policy and the internet focuses on two key areas e commerce including the role and responsibilities of online intermediaries such as google facebook and uber and privacy data protection and online crime in particular there is detailed up to date coverage of the crucially important general data protection regulation which came into force in may 2018

Parental Imprisonment and Children's Rights 2018 the book is an interdisciplinary exploration of the complexities of popular culture as a category of public policy it approaches the notions of cultural policy and popular culture flexibly examining what each comes to mean explicitly or implicitly in relation to the other this generates a rich variety of approaches but also a number of identifiable commonalities we start from the proposition that popular culture is largely absent as an explicit category of arts policy and debate today the arts are still in practice construed in terms of elite culture despite claims to the contrary while artefacts such as popular music television fashion and so on are assumed to figure among the cultural or creative industries giving the popular a set of narrowly economic professional and commodity connotations and yet the popular is in a range of ways powerfully present as an implicit dimension of public policy and as a catalyst of cultural practices and attitudes this apparent paradox underpins the proposal the book is a collaboration between two uk based institutions the university of leeds s popular cultures research network and the well established centre for cultural policy studies at the university of warwick this book was originally published as a special issue of international journal of cultural policy
