

IBM Parallel Environment (PE) Developer Edition

2013-02-12

this publication helps strengthen the position of ibm software solutions and enables for high performance computing hardware software and tools with a well defined and documented deployment model within an ibm environment as a result customers receive a planned foundation for dynamic infrastructure for parallel high performance computing hpc applications this ibm redbooks publication addresses topics to take advantage of the strengths of ibm pe developers edition for hpc applications the objective is to solve customer s challenges and maximize systems throughput performance and management this publication examines the tools utilities documentation and other resources available to help the ibm technical teams provide solutions and support for ibm hpc solutions in an ibm hardware environment this ibm redbooks is targeted toward technical professionals consultants technical support staff it architects and it specialists responsible for providing hpc solutions and support

IBM z/OS Mainframe Security and Audit Management Using the IBM Security zSecure Suite

2011-08-18

every organization has a core set of mission critical data that must be protected security lapses and failures are not simply disruptions they can be catastrophic events and the consequences can be felt across the entire organization as a result security administrators face serious challenges in protecting the company s sensitive data it staff are challenged to provide detailed audit and controls documentation at a time when they are already facing increasing demands on their time due to events such as mergers reorganizations and other changes many organizations do not have enough experienced mainframe security administrators to meet these objectives and expanding employee skillsets with low level mainframe security technologies can be time consuming the ibm security zsecure suite consists of multiple components designed to help you administer your mainframe security server monitor for threats audit usage and configurations and enforce policy compliance administration provisioning and management components can significantly reduce administration contributing to improved productivity faster response time and reduced training time needed for new administrators this ibm redbooks publication is a valuable resource for security officers administrators and architects who wish to better understand their mainframe security solutions
