this is the first comprehensive study of the political philosophy of the british philosopher r g collingwood best known for his contributions to aesthetics and the philosophy of history however

his political thought and in particular his book the new leviathan have been neglected even dismissed in some quarters professor boucher argues for the importance of this political theory and provides a perspicuous account of its development and originality he contends that the new leviathan is an attempt to reconcile philosophy and history theory and practice collingwood s distinctive contribution to modern political and social thought is seen as his sustained project of distinguishing utility from right and right from duty the passion for history coincides with the ethical thought because collingwood wishes to identify dutiful or moral action with a historical civilization drawing on a wealth of manuscript material this book will prove invaluable to political philosophers and intellectual historians

collingwood and hegel r g collingwood was a lonely thinker begrudgingly admired by some and bludgeoned by others he failed to train a single disciple just as he failed to communicate to the reading public his vision of the unity of experience this failure stands in stark contrast to the success of georg wilhelm friedrich hegel who won many disciples to a very similar point of view and whose influence on subsequent thought having been rediscovered since 1920 has not yet been adequately explored collingwood and hegel share three fundamental similarities both men held overwhelming admiration of the greeks both possessed uniquely broad knowledge of academic controversies of their day and both were inalterably convinced that human experience consti tutes a single whole if experts find collingwood s vision of wholeness less

satisfactory than hegel s much of the fault lies in the atmosphere in which col lingwood labored oxford in the 1920 s and 1930 s sceptical and specialized was not the enthusiastic heidelberg and berlin of 1816 to 183i what is important in collingwood is not that he fell short of hegel but that working under adverse conditions he came so elose indeed those unfamiliar with hegel will find in collingwood s early works especially in *speculum m entis* a useful introduction to the great german

roger collingwood's prolific works have shaped the debate about the nature of civilisation and its status as an ideal governing art morality and social and political existence as one of the few philosophers to subject civilisation and barbarism to close analysis roger collingwood was acutely aware of the interrelationship between philosophy and history in peter johnson's highly original work roger collingwood and the second world war facing barbarism johnson combines historical biographical and philosophical discussion in order to illuminate collingwood's thinking and create the first in depth analysis of roger collingwood's responses to the second world war peter johnson examines how roger collingwood's responses to the war developed from his early rejection of appeasement as a policy for dealing with hitler's germany through his view of britain's prosecution of the war once the battle with nazism had been joined and finally to his picture of a future liberal society in which civility is its overriding ideal

Report of the State Auditor to the General Assembly

1893

rethinking r g collingwood reviews collingwood s thought via his own rethinking of hegel it establishes the revisionary character of collingwood s defence of liberal civilization in theory and practice collingwood is seen as avoiding the pitfalls of hegel s teleological historicism by developing an open and contestable reading of the rationality of liberal civilization which neither reduces practice to theory nor philosophy to history the contemporary relevance of collingwood s standpoint is demonstrated by comparing it with those of recent defenders and critics of liberalism rawls lyotard and macintyre

Proceedings of the Society at Its 34th-Annual Meeting ...

1897

1 1 collingwood s reception collingwood s scholarly reputation is a complicated and variegated affair for one has not only to make a distinction between his reputation during his life and after his premature death in 1943 but also between his reputation as a philosopher and as an archaeologist and historian collingwood himself considered philosophy as his primary occupation and his work in archaeology and history as that of an amateur this work however reached the highest standards and his contributions to archaeology and history have always been appreciated accordingly though collingwood s reputation as the main expert on roman britain in the period between the two wars remains unchallenged modern developments in this field have inevitably

superseded his contributions and made them primarily voices from a past period philosophy was the other half of collingwood s scholarly life in his own thinking there was always a close relationship between philosophy and archaeological and historical practice his interpreters have not always recognized this connection i have met archaeologists who were surprised to hear that collingwood was a philosopher as well who either did not know that he had been a practising and philosophers archaeologist and historian or thought it no more than a private hobby collingwood s reputation as a philosopher was very different from the one he gained in archaeology and history for in the philosophical climate at oxford between the wars he was always an isolated figure

robin george collingwood 1889 1943 was one of the most important philosophers of the 20th century with his work spanning theory of knowledge metaphysics philosophy of art philosophy of history and social and political philosophy the full range and reach of collingwood s philosophical thought is covered by peter skagestad in this study following collingwood s education and his oxford career skagestad considers his relationship with prominent italian philosophers croce and de ruggiero and the british idealists taking collingwood s publications in order he explains under what circumstances they were produced and the reception of his work by his contemporaries and by posterity from religion and philosophy 1916 and *speculum mentis* 1923 to the posthumously published *the idea of history* 1946 featuring full coverage of collingwood s philosophy of art skagestad also considers his argument in response to a j aymer that metaphysics is the historical

study of absolute presuppositions most importantly skagestad reveals how relevant collingwood is today through his concept of barbarism as a perceptive diagnosis of totalitarianism and his prescient warning of the rise of populism in the 21st century
