The Manual of Astrology, the Standard Work 2010-09 first published in 1898 this is a very different astrology book from what we have now there are extensive delineations for the signs of the zodiac especially when found on the ascendant there are delineations of planets in signs when they are in the first house or are the chart ruler in both cases describing the physical appearance there are delineations of planets in the various houses which will also serve for the planetary rulerships of the houses there are only sketchy notes on aspects so far as the pure astrology of planets in signs in houses in aspect there is almost nothing at all the reason is found in the second part of the book we are not reading the chart as a psychological abstraction we are instead looking for specific traits attempting to answer specific questions will we have a profession what kind of marriage what kind of children will we vanquish our enemies or submit to them what kind of illness we then find the house s of the horoscope which rule the question and then delineate the signs planets we find there these are by the way the sort of questions that clients would ask if they only knew we could give answers the sort of things that astrologers themselves want to know in the process we learn how to read a chart get real meaning from it we get ideas from one section and then apply them to other sections there are hundreds and hundreds of useful aphorisms except that sepharial doesn't label them as such get this book study it underline key passages scribble in the margins you will learn more from this book than most all others put together

Astronomy and Astrology 2013-04-03 in the middle ages astronomia one of the seven liberal arts was as much about astrology as astronomy in fact the two disciplines only parted company in the seventeenth century as the materialistic world view gained greater prominence where once human destiny was connected to stars and planets and spiritual or soul qualities were associated with the natural world now the cosmos was seen as consisting of gases fire and dead rock rudolf

steiner brings a new spiritual perspective to our study of the heavens humanity he says is intimately connected to cosmic beings who in turn are related to planets and stars there is meaning in the cosmos although steiner rejects the simplistic notion of the planets determining our lives and behaviour he makes a clear connection between the heavenly bodies and human beings whilst criticizing the superficial nature of much astrology steiner shows that as individuals and with the guidance of spiritual beings we choose an appropriate time of birth to match the destiny we are to live this enlightening anthology expertly collated by margaret jonas features excerpts of steiner s work on the spiritual individualities of the planets the determination of human characteristics by the constellation at birth the cultural epochs and the passage of the equinox cosmic influences on the individual and humanity life in the planetary spheres between death and rebirth solar and lunar eclipses comets and much more
