on a flight from sacramento to denver professor ken o neal discovers he has a telepathic and loving connectedness with flight attendant michelle kolberg believing that other sensitives probably exist in their midst they embark on the formation of a group of like minds they call the omega project at a university of california campus the omega project s benevolent communication is suddenly threatened by powerful people in san francisco older men in secret covens who use ancient mind control techniques to trap their telepathic victims and perform horrific deadly

feedings on their brains to strengthen their own powers of domination a feeding on the brain of a university student named bonny ignites warfare between the covens and omega members with gruesome fatalities ken and michelle learn more about the frightening control of the leaders of the covens organization in europe forcing omega to go underground fearing the growing capabilities of the omega members the covens call upon their gypsy allies some of whom they casually sacrifice as part of their strategy to frighten and execute omega members furious the gypsies reluctantly realize they must reconsider their alliances the battle spills over into europe and some innocent bystanders who become aware of the coven monsters in their midst pay an awful price eventually acknowledging the compassionate intentions of the omega project the gypsy clans cautiously develop trust and agree to help omega launch a counterattack against the covens despite knowing they must face the evil emil who is powerful enough to kill by thoughts alone

some one hundred years ago the founding fathers optimistically launched psychology as a science the premise was that the new science must break away from its parental ties to philosophy and confine itself to gathering data preferably in the psychology laboratory there is little doubt that this early commitment to an observation and accumulation of data only policy was helpful in the launching of the new science some idea of how critical this move to empiricism was can be gathered from the following quotation taken from wolman 1973 p 32 it was not an easy task to transform the old mental philosophy into a natural science natural science used observation and experimentation they observed their subject matter as it were from without wundts psychology was supposed to study observable stimuli and responses but there was so much that was unobservable in psychology although the launching was eventually a success there is little doubt that the high hopes of the founding fathers have not materialized

the name dggtb deutsche gesellschaft für geschichte und theorie der biologien german society for the history and theory of biology reflects recent history as well as german tradition the society is a relatively late addition to a series of german societies of science and medicine that began with the deutsche gesellschaft für geschichte der medizin und der naturwissenschaften founded in 1910 by leipzig university s karl sudhoff 1853 1938 who wrote we want to establish a german society in order to gather german speaking historians together in our special disciplines so that they form the core of an international society yet sudhoff at this time of burgeoning academic internationalism was quite willing to accommodate the wishes of a number of founding members and drop the word german in the title of the society and have it merge with an international society the founding and naming of the society at that time derived from a specific set of historical circumstances and the same was true some 80 years later when in 1991 in the wake of german reunification the deutsche gesellschaft für geschichte und theorie der biologien was founded from the start the society has been committed to bringing studies in the history and philosophy of biology to a wide audience using for this purpose its jahrbuch für geschichte und theorie der biologien parallel to the jahrbuch the verhandlungen zur geschichte und theorie der biologien has become the by now traditional medium for the publication of papers delivered at the society s annual meetings in 2005 the jahrbuch was renamed annals of the history and philosophy of biology reflecting the society s internationalist aspirations in addressing comparative biology as a subject of historical and philosophical studies

can evidence based medicine ebm and complementary and alternative medicine cam find common ground a distinguished historian of medicine john s haller jr explores the epistemological foundations of ebm and the challenges these conceptual tools present for both conventional and alternative therapies as he explores a possible reconciliation between their conflicting approaches haller maintains a healthy scientific skepticism yet finds promise in select complementary and alternative cam therapies haller elucidates recent research on the placebo effect and shows how a new engagement between ebm and cam might lead to a more productive medical practice that includes both the objectivity of evidence based medicine and the subjective truth of the physician patient relationship haller s book tours key topics in the standoff between ebm and cam how and why the double blinded randomized clinical trial rct came to be considered the gold standard in modern medicine the challenge of postmodern medicine as it counters the positivism of evidence based medicine and the politics of modern cam and the rise of the national center for complementary and alternative medicine he conducts an in depth case study of homeopathy explaining why it has emerged as a poster child for cam and assesses cam s popularity despite its poor performance in clinical trials haller concludes with hope showing how new experimental protocols might tease out the evidentiary basis for the placebo effect and establish a foundation for some reconciliation between ebm and cam

the year in which this first number of annals of life insurance medicine goes to press happens to be the fiftieth anniversary of the swiss reinsurance company s activity in the field of underwriting and reassuring those risks which later became known as substandard lives in retrospect it is a far cry from the old days when life assurance proposals were either accepted or rejected on medical grounds to the modern principles and methods of rating substandard cases both medically and actuarially it can be assumed that in the course of the last few decades solutions or at least approximate solutions sufficiently accurate for practical purposes have been found to most of the numerous and often rather tricky actuarial problems relating to substandard policies adequate premiums and reserves no life assurer to day however can fail to recognize that actuarial skill may only be applied to of medical assessment even the lay under substandard life risks on the basis writer certainly realizes that the medical and statistical problems inherent in the underwriting of substandard risks are infinitely more complex than any actuarial consequences of a calculated or assumed extramortality it is primarily this basic fact which has stimulated the swiss reinsurance company s plans to intensify and develop its research work in the field of the medical assessment of substandard lives

although criminal justice systems in developed western countries are much alike in form structure and function the american system is unique while it is structurally similar to those of other western countries the punishments it imposes are often vastly harsher no other western country retains capital punishment or regularly employs life without parole three strikes or lengthy mandatory minimum sentencing laws as a result the u s imprisonment rate

of nearly 800 per 100 000 residents dwarfs rates elsewhere the oxford handbook of crime and criminal justice is an essential guide to the development and operation of the american criminal justice system a leading scholar in the field and an experienced editor michael tonry has brought together a team of first rate scholars to provide an authoritative and comprehensive overview and introduction to this crucial institution expertly organized the various sections of the handbook explore the american criminal justice system from a variety of perspectives including its purposes functions problems and priorities and present analyses of police and policing juvenile justice prosecution and sentencing and community and institutional corrections making it a complete and unrivaled portrait of how america approaches crime and criminal justice and giving persuasive answers as to why and how it has developed to what it is today accessibly written for a wide audience the handbook serves as a definitive reference for scholars and a broad survey for students in criminology and criminal justice
