the experience of music performance is always far more than the sum of its sounds and evidence for playing and singing techniques is not only inscribed in music notation but can also be found in many other types of primary source materials this volume of essays presents a cross section of new research on performance issues in music of the middle ages and renaissance the subject is approached from a broad perspective drawing on areas such as dance history art history music iconography and performance traditions from beyond western europe in doing so the volume continues some of the many lines of inquiry pursued by its dedicatee timothy j mcgee over a lifetime of scholarship devoted to practical questions of playing and singing early music expanding the bases of inquiry to include various social political historical or

aesthetic backgrounds both broadens our knowledge of the issues pertinent to early music performance and informs our understanding of other cultural activities within which music played an important role the book is divided into two parts viewing the evidence in which visually based information is used to address particular questions of music performance and reconsidering contexts in which diplomatic commercial and cultural connections to specific repertoires or compositions are considered in detail this book will be of value not only to specialists in early music but to all scholars of the middle ages and renaissance whose interests intersect with the visual aural and social aspects of music performance

when benito mussolini proclaimed that cinema is the strongest weapon he was telling only half the story in reality very few feature films during the fascist period can be labeled as propaganda re viewing fascism considers the many films that failed as weapons in creating cultural consensus and instead came to reflect the complexities and contradictions of fascist culture the volume also examines the connection between cinema of the fascist period and neorealism ties that many scholars previously had

denied in an attempt to view fascism as an unfortunate deviation in italian history the postwar directors luchino visconti roberto rossellini and vittorio de sica all had important roots in the fascist era as did the venice film festival while government censorship loomed over italian filmmaking it did not prevent frank depictions of sexuality and representations of men and women that challenged official gender policies re viewing fascism brings together scholars from different cultural and disciplinary backgrounds as it offers an engaging and innovative look into italian cinema fascist culture and society

this book strives to unmask the racial inequity at the root of the emergence of modern physical culture systems in the us progressive era 1890s 1920s this book focuses on physical culture systematic non competitive exercise performed under the direction of an expert because tracing how people practiced physical culture in the progressive era especially middle and upper class white women reveals how modes of popular performance institutional regulation and ideologies of individualism and motherhood combined to sublimate whiteness beneath the veneer of liberal progressivism and reform the sites in this book give the fullest picture of the different strata of physical culture for white women during that time and demonstrate the unracialization of whiteness through physical culture practices by illuminating the ways in which whiteness in the us became a default identity category absorbed into the universal ideals of culture arts and sciences the author shows how physical culture circulated as a popular performance form with its own conventions audience and promised profitability finally the chapters reveal troubling connections between the daily habits physical culturists promoted and the eugenics movement s drive towards more reproductively efficient white bodies by examining these written visual and embodied texts the author insists on a closer scrutiny of the implicit whiteness of physical culture and forwards it as a crucial site of analysis for performance scholars interested in how corporeality is marshaled by and able to contest local and global systems of power
