what if you could challenge your eleventh graders to come up with a design solution for developing managing and utilizing mineral resources with this volume in the stem road map curriculum series you can mineral resources outlines a journey that will steer your students toward authentic problem solving while grounding them in integrated stem disciplines like the other volumes in the series this book is designed to meet the growing need to infuse real world learning into k 12 classrooms this

interdisciplinary three lesson module uses project and problem based learning to help students develop an in depth understanding of mineral resources by researching the utility and impact of particular mineral resources on society working in teams students will locate quantitative and qualitative data on mineral resources and discern the reliability of the information then use their data to write an opinion article and develop a website to convince readers of the effectiveness of a particular design solution for developing managing and utilizing mineral resources to support this goal students will do the following explain how mineral resources are located and used in various ways in society explain why mineral resources are important to society critically evaluate quantitative and qualitative data about mineral resources write an opinion article demonstrating their knowledge about competing design solutions for extracting mineral resources the stem road map curriculum series is anchored in the next generation science standards the common core state standards and the framework for 21st century learning in depth and flexible mineral resources can be used as a whole unit or in part to meet the needs of districts schools and teachers who are charting a course toward an integrated stem approach

the research reported in caught in the act draws together the insights gained from a continuous professional development initiative for high school mathematics teachers teaching in low socio economic status and socially challenged environments in south africa the chapters show the possibilities for enhancing achievement in school mathematics if a strength based approach is adopted to develop teaching with teachers and when their concerns are taken seriously the book demonstrates that the ecological relevance fitness for the context in which teachers are teaching of the goods developed and distributed by initiatives should be a major consideration to offer hope for sustainable implementation to improve school mathematics education the book is of interest to mathematics teachers school leaders mathematics curriculum advisors policy makers and researchers

Proceedings of the (H)IGCSE Colloquium on Teacher Education

1995

this book discusses examples of discrete mathematics in school curricula including in the areas of graph theory recursion and discrete dynamical systems combinatorics logic game theory and the mathematics of fairness in addition it describes current discrete mathematics curriculum initiatives in several countries and presents ongoing research especially in the areas of combinatorial reasoning and the affective dimension of learning discrete mathematics discrete mathematics is the math of our time so declared the immediate past president of the national council of teachers of mathematics john dossey in 1991 nearly 30 years later that statement is still true although the news has not yet fully reached school mathematics curricula nevertheless much valuable work has been done and continues to be done this volume reports on some of that work it provides a glimpse of the state of the art in learning and teaching discrete mathematics around the world and it makes the case once again that discrete mathematics is indeed mathematics for our time even more so today in our digital age and it should be included in the core curricula of all countries for all students

this volume brings together diverse thinkers and practitioners on participatory action research par and educational development in south asia contributors draw from their research and field experiences on how par is currently being understood theorized debated and implemented for education of children in south asia this book will act as a key reference text for academics students and practitioners interested in the intersection of education and participatory development in the region the book opens a constructive debate on par approaches to education and proposes a reflective framework that allows the reader to develop their perspectives about the conceptual methodological and sociopolitical potential and limitations of participatory approaches
