society today faces a difficult contradiction we know exactly how the physical limits of our planet are being reached and exactly why we cannot go on as we have before and yet collectively we seem unable to reach crucial decisions for our future in a timely way this book argues that our definition of prosperity which we have long assimilated with the idea of material wealth may be preventing us from imagining a future that meets essential human aspirations without straining our planet to the breaking point in other words redefining prosperity is a necessary and urgent task this book is the fruit of a long debate among 15 scholars from diverse fields who worked together to bring the depth and nuance of their respective fields to questions that affect us all the result is a rich transdisciplinary work that illuminates the philosophical and historical origins of our current definition of prosperity identifies the complex processes that gave rise to the problems we face today elucidates the ways in which our contemporary environmental social nutritional economic political and cultural crises are interconnected and explores why a half century of economic growth has neither increased life satisfaction in the west nor vanquished world poverty approaching these broad ranging questions from the specific standpoints of their disciplines each of the authors offers thoughts for the future considering possible escape routes and proposing changes to the way we live behave and organise society and public action changes that actually respond in an equitable way to our deepest aspirations ultimately in laying the groundwork for a public debate on this subject this book poses a question to its readers what is your definition of prosperity and what can be done to promote it

new tools for succeeding globally why do so many global strategies fail despite companies powerful brands and other border crossing advantages because a one size fits all strategy no longer stands a chance when firms believe in the illusions of a flat world and the death of distance they charge across borders as if the globe were one seamless marketplace but cross border differences are larger than we assume most economic activity including trade real and financial investment tourism and communication happens locally not internationally in this semiglobalized approach companies can cross borders more profitably by basing their strategies on the geopolitical differences that matter they must identify the barriers their strategies will have to overcome and they must build bridges to cross those barriers based on rigorous research pankaj ghemawat shows how to create successful strategies and provides practical management tools so you can assess the cultural administrative geographic and economic differences between regions at the industry level and decide which ones require attention track the implications of the specific border crossing actions that will impact your company s ability to create value the most generate superior performance through strategies that are optimized for the three a s adaptation adjusting to differences

aggregation overcoming differences and arbitrage exploiting differences using in depth examples ghemawat reveals how companies such as cemex toyota procter gamble tata consultancy services ibm and ge healthcare are adroitly managing cross border differences he also shares examples of other well known companies that have failed at this challenge crucial for any business competing across borders redefining global strategy will help you make the most of our semiglobalized world

some of the most popular works of nineteenth century music were labeled either hungarian or gypsy in style including many of the best known and least respected of liszt s compositions in the early twentieth century béla bartók and his colleagues questioned not only the hungarianness but also the good taste of that style bartók argued that it should be discarded in favor of a national style based in the genuine folk music of the rural peasantry between the heyday of the nineteenth century hungarian gypsy style and its replacement by a new paradigm of authentic national style was a vigorous decades long debate one little known inside or outside hungary over what it meant to be hungarian european and modern redefining hungarian music from liszt to bartók traces the historical process that defined the conventions of hungarian gypsy style author lynn m hooker frames her study around the 1911 celebration of liszt s centennial in so doing she analyzes liszt s problematic role as a hungarian born composer and leader of hungarian art music who spent most of his life outside of hungary and questioned whether hungary s national music was more the creation of hungarians or roma gypsies the themes of race and nation that emerge in the discussion of liszt are further developed in an analysis of discourse on hungarian national music throughout the hungarian press in the late nineteenth and early twentieth centuries showing how the discovery of genuine folk music by bartók and kodály often depicted as a purely scientific matter responds directly to concerns raised by earlier writers about the problem of hungarian music hooker argues that the innovations of bartók and kodály and their circle are not so much in correcting a flawed concept of the national as in using the idea of national authenticity to open up freedom for composers to explore more stylistic options including the exploration of modernist musical language meticulously researched and elegantly written redefining hungarian music from liszt to bartók is essential reading for musicologists musicians and concertgoers alike

this study challenges the orthodox view that emergent regional varieties of french represent no more than an ephemeral dialect residue of little theoretical interest it follows the life cycle of an obsolescent urban picard variety spoken in a mining town in the pas de calais and attempts to unravel the complex reasons behind the survival of some local variants at the expense of others applying a sociolinguistic model developed by peter trudgill it shows how the processes of levelling and simplification have driven change in a dialect contact situation giving rise to a new stable variety or koine this is compared with other new urban varieties in sweden and the uk where different economic social and demographic conditions have produced very different linguistic outcomes the emergence of regional french in the north it is argued may herald the start of a new diversification of french in europe this book will therefore interest both students of french and of language variation more generally
