bertolt brecht once worried that how we feel about the victims of a social problem can get in the way of the beauty and attraction of the problem itself in this book walter benn michael explores the same dilemma through a study of several contemporary artist photographers whose work speaks to questions of political economy michael focuses on the work of several artists mostly born in the 1970s and thus raised in a world where artistic ambition has been identified with a critique of autonomous form and of meaning as a function of intention michael shows that these artists engage but also push beyond this critique of autonomy and intentionality producing works that embody a new commitment to form and meaning the explanation for this commitment he argues is these artists consciousness of making art in an economy riven by structural conflict especially an unprecedented rise in inequality for them he argues the relationship of the art work to the world to its subject and to its beholder functions as an emblem of the relation between classes rather than identities or subject positions this book will join the short shelf of essential writings about the medium of photography

excerpt from social theory men do not make communities they are born and bred into them every individual at his birth is flung into a social environment and his life's work from infancy is to make the best of that environment for himself and for his fellows as he grows to fuller consciousness his environment gradually expands he becomes aware of the family contact with which furnishes his first social experience at the same time he becomes aware also of a larger world outside the family a world of wisdom of things seen from windows and on journeys from home a world which slowly assumes

definite shapes and takes on human characteristics of neighborhood and similarity as he grows older the fact of organization in this world becomes apparent and school church club and other social institutions claim him and assume a part in his life about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

crime in the streets has remained consistently among the most conspicuous aspects of the american political landscape sasson argues that the significance of our national pre occupation with the issue depends on how it is constructed or framed in the mass media and in everyday conversation drawing on the methodology for analyzing issue frames in political discourse developed by william gamson who has contributed a foreword to this book sasson identifies the five interpretative frames that comprise the crime debate faulty system social breakdown blocked opportunities media violence and racist system tracking the performances of these frames in twenty small group discussions among black and white urbanites and in a sample of newspaper columns he demonstrates that the two generally conservative frames faulty system and social breakdown are by far the most prominent he explains their prominence in the group discussions through a careful analysis of the ideational resources popular wisdom personal experience media discourse used by the participants sasson s empirical findings lead him to conclude that the american preoccupation with crime will generate recurrent demands for a more expansive and punitive criminal justice system and new support for conservative politicians and their causes apart from its contribution to the understanding of the civic role of crime and of the politics of crime control crime talk also advances a methodology for framing popular discourse and a theoretical perspective on how ordinary citizens make sense of social problems a study at the intersections of criminology and political sociology it will

capture the attention of a wide range of social scientists as well as instructors in courses on social problems the mass media and research methodology
